SUPER MARIO SUPER INTRODUCTION BY

GENERAL MANAGER OF NINTENDO CO., LTD.
ANALYSIS AND DEVELOPMENT, GAME PRODUCER

TAKASHI TEZUKA

It's been over thirty years since *Super Mario Bros.* first went on sale, and for all those years, Takashi Tezuka has been working on the development of the series. Now he has a message for all of Mario's fans!

MY FRIEND MARIO!

THIS MIGHT TURN OUT TO BE SOMETHING REALLY INCREDIBLE . . .

Now, over thirty years on, it's safe to say that the *Super Mario* series has been an unqualified hit, selling more than three hundred million copies of the various games over that time. I could never have imagined that so many people would have played it. There are many things that I still remember about the creation of *Super Mario* like it was yesterday. Just before it went on sale, I was walking down the hallway outside of a meeting room with Miyamoto [Shigeru Miyamoto, Creative Fellow at Nintendo Co., Ltd.], when he said, "Tezuka, *Super Mario* might turn out to be something really incredible." It seemed to him that this felt a lot like when *Donkey Kong* was about to come out. But even after I heard his words, they didn't strike me as reality. Having worked there for only two years, I was still relatively new, and at the time I had never experienced a hit game.

HIRING CATS?!

When the Famicom [the Japanese release of the Nintendo Entertainment System] went on sale in 1983, I was job-hunting, and a chance word from a friend changed my life forever: "Hey, there's a company that looks interesting." That company turned out to be Nintendo.

The Famicom had only just gone on sale, and I hadn't even touched one. I had seen the Game & Watch and was drawn to it because it looked fun and had a simple design. I thought that a company that could design the Game & Watch might be a good place to work, so I applied to Nintendo and got a job.

Normally I'd have had to wait for April 1st to start work at a company like that, as is the norm in Japan. But before I was officially hired, they called me up and asked if I'd work part-time on an arcade game called *Punch-Out!!* . . .

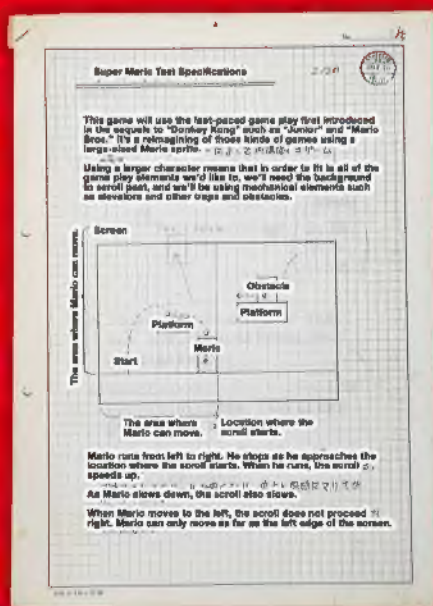

I was drawing pixel art. At the time, Nintendo was so understaffed, they would have hired cats if they thought it would help.

LARGE, FAST CHARACTERS

When I officially joined the company, it wasn't to be on the team building the Game & Watch, but rather in the Creative division [eventually called Nintendo Entertainment Analysis and Development] — a small department with only about six people. We'd design playing cards and user manuals, and every now and then we'd get together with someone from a different division to help work on games. As I remember, it was pretty fun to go to work every day.

One of these people was Shigeru Miyamoto, and that began a game-making partnership that's lasted for thirty-plus years. The first one we worked on together was *Devil World* for the Famicom.

📌 A handwritten note on *Super Mario Bros.* during the time of its development. It calls for "large, fast characters."

I was in charge of pixel art, but I never heard one word about the new game that Miyamoto was planning until after *Devil World* had already gone on sale.

He said, "For the next one, let's make a fast-paced game that has levels on the land, in the sea, and in the air, and let's do it with large characters!" "Large characters" actually meant a character just sixteen by thirty-two pixels. At the time, "small characters" were half that size, at sixteen by sixteen pixels. Those were more commonplace.

So we started testing large characters on the screen and seeing how they moved, and the feedback we got was extremely positive. That's when we started calling this large character "Super Mario," and that was the official start to the project.

At the time, Nintendo's building was very close to a temple called Toufukuji, which is famous for the color of the leaves in autumn. We entrusted the programming of *Super Mario Bros.* to a company called SRD, and Nintendo set up a room for them. Unfortunately the room was just some extra space between floors, and the place felt more like a low-ceilinged storeroom.

There were seven members in the core group. The director was Miyamoto, I was his assistant, and the guy in charge of sound was Koji Kondo, who joined the company at the same time I did. By the way, one person who worked for SRD, Toshihiko Nakago, went on to develop both the *Mario* and *Zelda* series.

When we started to develop the game, first Miyamoto and I would design the levels together. We'd draw them on huge sheets of graph paper, and the next morning, we'd deliver them to SRD. By that evening, they'd be finished programming it. At that point Miyamoto and I would play the heck out of it, make changes, put all of our notes and instructions in writing, and hand it all to them the next morning. Every single day was a repeat of that. We'd be there pretty much every day until the lights went off and we had to go home. Miyamoto would always be in the office even later than I was.

THE VINE THAT LEADS TO THE SKY!

The aspect of the *Super Mario Bros.* development that really excited me was the “air” part of the “land, sea, air” concept. I couldn’t help but think that it would be so fun to play in the sky! It was then that we considered having Mario board a cloud and do battle in the air.

This may sound obvious, but it meant we needed enemies who were also flying through the air. But because of the very small capacity of the Famicom game cartridges at the time, we had almost no room to add new characters. So we decided to simply add wings to a character that already existed. That’s how Koopa Paratroopa was born—by giving wings to the Koopa Troopa.

We came up with a trial product, but unfortunately, it wasn’t any fun at all. It was too much like a shooting game, and it didn’t have the feel we wanted from our Mario game. And so we did away with the sky aspect, but the desire to do adventures in the sky remained with me.

At one point I said to Miyamoto, “What if we did a Jack and the Beanstalk kind of thing, where Mario can climb a beanstalk up into the sky? I’d love that!” I was just tossing out ideas, but Miyamoto made a level where Mario could climb a vine into the sky. He reused some elements he’d already created and constructed a level with them. I thought that no one else in the world but he could do that.

It’s easy to throw out ideas, but to be able to build a game you can actually play from those ideas is crucial. I had joined the company two years prior, but I think it was at that moment that I learned just what was important in game design.

SHIITAKE MUSHROOMS

One more thing I wanted to talk about was when I was doing pixel art for the Goombas. When we first started working on the game, the original enemy that you’re supposed to meet is the Koopa Troopa. From our stand-point, the Koopa Troopas were pretty easy to defeat. You jump on them and they vanish into their shells. But for people who were just starting, this was extremely hard. So we thought we would need an easier enemy, one you could just jump on to destroy, so that people just starting the game could easily defeat them. We were nearing the completion of the game when Goombas showed up for the first time. By the way, their Japanese name is Kuribo because they look a little

like chestnuts [*kuri* in Japanese], but in actuality, they’re shiitake mushrooms.

It was really a lot of things coming together that led to the development of the original *Super Mario*, and we had plenty of rough patches after that, but we’ve always given it our creative all when we are making the games. I honestly feel that I’ve been just concentrating on these games, and before I knew it, thirty years had passed. At the same time, it feels like a long time, and I’ve been fortunate to play in a world that defies age demographics. It’s made me a very happy man.

MARIO’S ADVENTURES ARE FAR FROM OVER!

The latest game in the series is *Super Mario Maker*, which went on sale in 2015. This game could only come about because of the Wii U GamePad. Now that I’ve seen what the Wii U can do, I really want to do a new version of *Mario Paint* like we had for the Super Famicom [SNES]. I was thinking how fun it would be to draw some cool pictures using the stylus that comes with the Wii U GamePad. There were a lot of special circumstances that prevented *Mario Paint* from being fully realized on the Super Famicom; *Super Mario Maker* was programmed with a lot of the ideas from *Mario Paint* in mind.

For example, the cursor has become a cat's paw. As I said before, when I first got some part-time work from Nintendo, they probably would have hired cats if they thought it would help. Well, this time we really have a "cat" working for us. Actually, I have ten cats at home, and I brought two of them to work and had them photographed. Of course, there are a lot of other interesting ideas in the game aside from cats' paws. I think you'll find a lot of things in *Super Mario Maker* that you will not find in any other *Super Mario* game!

After thirty years of making *Mario* games, Mario has come to be something of a friend to me. I've gone through a lot of games with the purpose of making Mario a more likable character, but there were so many times when it was Mario who made me more courageous. So it's my intention to keep on hanging out with Mario. Thirty years is just a checkpoint along the way.

📖 The booklet packaged with the game *Super Mario Maker* features the paw of one of Tezuka's cats.

Finally, I want to show my appreciation to all of you who have spent your time playing with Mario. Truly—thank you! His adventures are just starting, and we hope you and Mario will be adventuring together for a long time to come.

P. 58

Super Mario World went on sale at the same time as the SNES! It was the first game that included Yoshi and Ghost Houses. You'll encounter a lot of new enemies, so we've redone Yoshi's interactions with them. See Yoshi eat a Dry Bones, then spit out the bones for the first time!

NEWLY ADDED ACT IONS

SPIN JUMP

This game is where Mario's Spin Jump debuted, allowing you to defeat certain enemies and get over traps.

We've added an Airship theme, which wasn't in the original!

NEW SUPER MARIO BROS. U

P. 204

If you put in the original software and use the GamePad, you can have a five-person multiplayer game. With *Super Mario Maker*, this is the only style where the characters are rendered in 3D! Yoshi also appears here!

ACTIONS UNIQUE TO THIS STYLE

TRIPLE JUMP

If you dash and jump, then use good timing to jump again each time you land, you can do a triple jump.

GROUND-POUND

You can ground-pound when you press down on the \downarrow Control Pad while in the air. Use it to attack or activate machinery, among other uses.

WALL JUMP

Jump and kick the wall, and it will send you high to the opposite side. That action was introduced with the arrival of 3D Mario games, and you can use it here too.

PROPELLER MARIO

When Mario gets a Propeller Mushroom, Mario dons a Propeller Suit. After a huge jump into the air, you descend slowly to the ground. You can attack enemies by quickly descending.

OVERVIEW OF ALL 17 TITLES

The character names and illustrations given for each title in this book are generally representative of how they appeared at the time. Terms that did not receive an official English name are derived from the direct Japanese translation.

Super Mario Bros.

30-YEAR SERIES TIMELINE

The Beginning

It's been over thirty years since the introduction of *Super Mario Bros.* in Japan on September 1, 1985 (October 18, 1985, in North America). Although it starts as a 2D side-scrolling action series, it has evolved into a 3D world from pixel art to polygon-rendered 3D graphics, and then back again to a 2D world in an advanced form. As time passes, the series changed in both form and features.

The intent of this book is to take a close look at the process by which the series has evolved and document the history of this beloved franchise. We want this to be the ultimate encyclopedia about the *Super Mario Bros.* series.

It would give us great pleasure if this book could remind you and the friends you play it with of your fondly-remembered days who truly love the Mario games of any way, that would be the highest honor we could receive.

How This Book Is Organized
Each of the seventeen official games in the *Super Mario* series is featured according to the release order below. Although most of the in-game screenshots are kept the same as they were at the time of release, there are a few that have been updated since then. The information in this book is the product of research by the Japanese editorial department, the American editing department, and a team of English translators and fact checkers.

Each game is organized according to the following four categories:

- An introduction to the game and overview of the story.
- How an individual player controls a game and the enemy characters that appear in the game.
- How an artist's design of all enemy characters and other parts of the game world is chosen.

THE SUPER MARIO VIDEO SERIES

Meet the Mario Family!

We'll be starting off with Mario, Luigi, Princess Peach, the Koopas, and all the regular characters, including the best supporting characters and enemy characters that have appeared throughout the *Super Mario Bros.* series! Although we'll go into all of the other characters that appear in the games later in this book, here are all the main characters, without whom it wouldn't be a *Super Mario* game.

☉ Mario

The hero, always bright and cheerful, but he's not afraid to stand up to the Koopas when they step out of line!

☉ Luigi

Mario's slightly younger twin brother. He's a bit more cautious than Mario but has a very strong sense of justice.

A citizen of the Mushroom Kingdom who is loyal to Princess Peach. Toad helps Mario on his adventures.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

One day the kingdom of the peaceful mushroom people was invaded by the Koopa, a tribe of turtles famous for their black magic. The quiet, peace-loving Mushroom People were turned into mere stones, bricks and even field horse-hair plants, and the Mushroom Kingdom fell into ruin.

The only one who can undo the magic spell on the Mushroom People and return them to their normal selves is the Princess Toadstool, the daughter of the Mushroom King. Unfortunately, she is presently in the hands of the great Koopa turtle king.

Mario, the hero of the story (maybe) hears about the Mushroom People's plight and sets out on a quest to free the Mushroom Princess from the evil Koopa and restore the fallen kingdom of the Mushroom People.

You are Mario! It's up to you to save the Mushroom People from the black magic of the Koopa!

FEATURES

THE GAME THAT STARTED IT ALL!

Super Mario Bros. is a side-scrolling 2D action game that was built to be played on the newly released NES game console. Afterward it became the foundation for the entire series. Part of the game's fun came from the fireworks, Warp Zones, and other hidden features that made it an enduring topic of discussion in schoolyards everywhere. It became a huge hit, selling a total of over forty million units and spreading the name Mario all over the world.

SUPER SIDE-SCROLLING ACTION!

Mario was originally "Jumpman," the hero of the arcade game *Donkey Kong*. *Super Mario Bros.* was built on the satisfaction the player got from successfully jumping over obstacles. At that time, the NES featured a lot of fixed-screen games. This game, however, had right-scrolling movement that progressed at the speed that Mario moved as he jumped and dashed his way toward the goal. This became the benchmark for all the side-scrolling action games that followed to this very day.

YOUR PICK OF POWER-UPS!

This game featured items that could power Mario up. Among other things, he can become giant-sized with a Magic Mushroom or pick a Fire Flower and become Fiery Mario. All kinds of items can give him unexpected abilities that aid him on his adventure. Fiery Mario's ability to defeat enemies by throwing fireballs inspired tons of new items that appeared in later installments!

ITEMS & OBSTACLES

You're going to find some useful items and hazardous obstacles while running through the courses.

? BLOCK

Hit them to get coins or power-ups to come out.

1-UP MUSHROOMS

This item gives you an extra life. They're often well-hidden in unexpected places.

BILL BLASTER

Bill Blasters fire off Bullet Bills in Mario's direction.

BOWSER'S FLAMES

They appear in the second half of the castle courses. Avoid this extra obstacle!

BRICK BLOCK

They usually shatter when Super Mario hits them, but some contain hidden items.

COINS

Glittering all over the place in each course. If you can gather one hundred, Mario gets an extra life.

FIRE BAR

Rotating lines of fireballs that go clockwise or counterclockwise, and some are longer in length.

FIRE FLOWER

Power-up with one to turn Mario into Fiery Mario!

FLAGPOLE

The instant Mario grabs it, you've cleared the course! The higher you jump on, the more points you get.

HIDDEN BLOCK

There are invisible blocks hidden everywhere. Hit them and they can give you coins and other items.

JUMPING BOARD

When Mario hops on, he bounces. If you time the jump well, he can jump even higher.

MAGIC MUSHROOM

With this, Mario is powered up to Super Mario!

PIPE

They come in many different lengths. They can also lead to hidden areas.

PLATFORM

Some move in one direction while others can travel back and forth.

SCALES

A set of platforms connected by a rope. When one goes down, the other goes up.

STARMAN

This power-up makes Mario invincible for a short time.

VINE

These can lead to a bonus area if Mario climbs them. You may also find warp zones with them.

WARP PIPE

These pipes are connected to Warp Zones. Mario can enter them to be whisked to another world.

AND MORE

MEMORABLE MOMENTS

Here are some scenes fans are sure to remember! These iconic places and moments set the standard for many adventures to come.

SECRET AREAS

Hidden among the pipes are ones that will lead Mario to a bonus areas filled with coins. Sometimes pipes will lead to water areas, and sometimes they're hidden shortcuts!

HIDDEN 1-UPS!

There's a hidden 1-Up Mushroom in the first area of each world, which can be quite difficult to obtain. If you use a warp to get to the world or lose all your lives and get a "Game Over," you won't be able to find the 1-Up Mushroom. There are also hidden conditions. For example, if you don't get a certain number of coins in the previous world's third course, the 1-Up Mushroom won't appear.

IMPOSTERS!

There's a Bowser at the end of every castle course, but the Bowsers in Worlds 1 through 7 are fakes! If Mario throws five fireballs at them, he can defeat them and reveal their true identity—there's a different imposter in each world.

CLIMB INTO THE CLOUDS!

There are vines hidden in World 2-1 and World 3-1 that Mario can use to climb into the clouds. These lead to bonus areas where Mario can ride a platform and collect coins. There are a total of five vines, but the one in World 4-2 leads to a Warp Zone.

HARD MODE

Once Mario rescues Princess Toadstool, you can begin a new adventure in Hard Mode. Goombas become Buzzy Beetles, all of the enemies move faster, and the platforms get smaller. All of this combined makes the game that much harder. Also, if you press the B Button on the title screen, you can choose between worlds.

HELPFUL HINTS & TECHNIQUES

There are many hidden components to this game. Here we discuss moves that were called "secret tricks" at the time.

THE WARP ZONE

There are two hidden areas where you can find Warp Pipes to places farther on in the game. The first is in World 1-2. If you run over the ceiling past the pipe that leads up to the goal, you'll reach the Warp Zone. There are three pipes warping to Worlds 2 through 4. Another is in World 4-2. If you run along above the ceiling, you can warp to World 5. If you find the hidden Warp Zone at the top of a hidden vine, you can get to Worlds 6 through 8.

UNLIMITED 1-UPS

On the steps, if you keep jumping on a Koopa Troopa or Buzzy Beetle shell, you can get continuous 1-Ups. Try standing on a step, and when the shelled fiends are one step away, jump on them. If you can time it right, you can keep bouncing, getting yourself a series of 1-Ups. This is easiest on levels such as World 3-1 and World 7-1.

A HANDY ELEVATOR

If you step on a Bullet Bill in World 6-3, it stops in mid-air. If you keep jumping on it, a line extends downward and it can be used like a down elevator.

HAMMER BROTHERS ON THE MOVE

Hammer Brothers usually jump and throw their hammers from the same spot, but if you wait a while, they'll bring the fight to you.

THE LEGENDARY MINUS WORLD

At the end of World 1-2, just before you reach the pipe that leads to the goal, break all but the rightmost brick blocks above the pipe, then push Mario backward at it. You'll pass through the wall arriving at the Warp Zone area. If you can get Mario into a pipe before the words appear, World -1 comes on the screen, and you enter an unusual water course—the legendary "Minus World." When using the Famicom Disk System version, the courses are different.

CLEVER GRAPHICS

The graphics for the clouds floating in the air and the bushes on the ground are the same graphic with the color changed. It was a clever trick that saved space on the highly limited capacity of the game's ROM chips.

FIREWORKS SHOW

When you finish the course and your time ends in a 1, 3, or 6, a matching number of fireworks go off.

THE CROWN

If you have ten or more lives, the tens' spot is replaced by a crown.

CONTINUE

If you get a "Game Over" in World 2 or beyond, hold down "A" and you'll start back at the first course of that world.

A MIRACULOUS TRANSFORMATION

In levels like World 6-1, if you hit the bottom-left brick block from below, the Spiny transforms into a Koopa Troopa. In the same way, hitting the leftmost block in the middle of World 1-1, it transforms a Goomba into a Koopa Troopa.

SMALL FIERY MARIO

This is a little-known technique that allows you to shoot fireballs even when you're Small Mario. In W1-4, become Super Mario (or Fiery Mario) and allow Bowser to hit you when you hit the axe. Mario will become transparent when he rescues the Mushroom retainer. At the beginning of the next course, you'll appear as Super Mario, despite the fact Mario should be small. The game will spawn a Magic Mushroom, and when you pair it with a Fire Flower, you'll become a small version of Fiery Mario, growing briefly every time to attack. If Mario's hit by an enemy, he'll revert to Super Mario again.

INTRODUCTION

STORY

*This text is translated from the Japanese instruction booklet.

The Mushroom Kingdom was a peaceful place until the day that Bowser used his powerful magic and invaded, along with his clan of huge turtles. Bowser's magic turned the harmless mushroom people into rocks, bricks, and plants, and the Mushroom Kingdom fell into ruin.

The only one who can break the magic spell and revive the mushroom people is the Mushroom Kingdom's Princess Toadstool, but she's now a prisoner of the Koopa king.

But Mario has stood up and raised his hand, ready to defeat the members of the turtle clan, rescue Princess Peach, and once again restore peace to the Mushroom Kingdom.

The Mario you see on TV is you. You are the only one who can complete this quest!

FEATURES

THE LOST LEVELS

Released in Japan in 1986, this game was the second installment of the *Super Mario* series. American audiences did get to experience an updated version of this game with the 1993 release of *Super Mario All-Stars* for the SNES, although that version featured improved graphics and gameplay. An unmodified release didn't occur in America until 2014, when the game was released for the Wii U Virtual Console in its original form. For these reasons, we've left the images and details in this section true to the original Japanese release, save for one thing—we've kept the American title *Super Mario Bros.: The Lost Levels* to avoid confusion with what we know as *Super Mario Bros. 2*.

FOR SUPER PLAYERS!

In Japan, this was the second side-scrolling 2D action game in the Mario series, this time made for the Famicom Disk System game console. The "For Super Players" sticker on the cover meant it was designed for those gamers who had already played *Super Mario Bros.* all the way through; it's definitely more difficult than the previous game. The basic system is the same, but now Poisonous Mushrooms hurt Mario if he touches them, and strong winds can blow him off course—just two of the many difficult new tricks and traps. As long as you fulfill all the conditions, you can play a total of fifty-two courses.

A SINGLE PLAYER GAME

Unlike the original game where two players could take turns playing as Mario and Luigi, in this game a single player can choose to play as Mario or Luigi. The two have different abilities: for example, Luigi jumps higher than Mario, but he can't stop as well as Mario can. This is the first time that Luigi had different gameplay mechanics than Mario, and those characteristics are reflected in most of the games that came after.

In certain places during the courses, strong winds push Mario's body forward.

AND MORE

This game was filled with memorable scenes—some even appeared for the first time in this game! You'll also learn how to reach parallel worlds.

This dangerous mushroom is hidden in ? Blocks and can cause damage if Mario touches it. Additionally, it looks different underground than it does above ground. In the underground

courses, the Poisonous Mushroom can be easily mistaken for a 1-Up Mushroom. Because the Poisonous Mushroom is an item, it will disappear when you produce another item.

Bloobers usually chase Mario when he's swimming through the water, but in this game, they appear in aboveground

courses. They chase Mario through the air in just the same way that they do in the water. In this case, you can defeat them by jumping on them, so they're much easier to deal with.

Red Pirana Plants appear for the first time in this game! Even when Mario is standing right next to the pipe, they still appear, so they're a bit more troublesome an enemy to deal with. Now, these red-colored enemies have become commonplace in the *Super Mario* series.

Just before the final battle with Bowser in W8-4, Mario fights a Bowser with a blue body. Mario also encounters Blue Bowsers in W9-3 and WD-4. Whatever they are, they have the same powers as Bowser, but their real identities are a mystery...

There are *THIRTY-TWO* courses between W1 and W8, and if you clear them all without warping (or going back in a warp), you can go to W9 after the ending is over. One course looks like it's aboveground, but it's actually underwater. In fact, most of them have a motif of courses from the previous game, the original *Super Mario Bros.*, but gone a bit buggy. You start with Mario having only one life left, and if you make it all the way through, you get an onscreen message from the staff!

After clearing course W8-4 and returning to the title screen, you'll see a number of stars to the upper-right of the logo. If there are more than eight stars, you can take up the challenge of a parallel world (WA through WD) by pressing the Start Button while holding down the A Button. By the way, even if you collect more than twenty-four stars, the number by the logo won't go over twenty-four.

HELPFUL HINTS & TECHNIQUES

These useful tips will help you make it through this difficult game. Additionally, things have changed between this and the last game.

CONSECUTIVE 1-UPS

As in the first game, you can put a shell between two blocks (or other obstacles) to get a 1-Up. If you use the Red Koopa Troopa right after starting, the rest of your Mario adventure will be much less stressful.

THESE BLOCKS ARE A BREEZE

If you place Mario on top of blocks when the wind blows, and repeatedly press the left button on the +Control Pad, Mario can enter the blocks and go through them. Depending on where you are, this can be very helpful.

BEYOND THE FLAGPOLE!

Getting beyond the flagpole was really hard in the previous game, but in this one, it's really easy! Luigi can jump over the pole with ease, and Mario can, too, by using the Super Spring or Hidden Blocks. There are even Warp Zones beyond the pole!

THE REVERSE WARP ZONE

Most Warp Zones send Mario forward to new worlds, but there are a few reverse Warp Zones that send him back to earlier worlds. A warp in W3-1 will send him back to W1-1, and one in W8-1 will take him back to 5-1. Be careful!

1-UP AT THE FLAGPOLE

When you reach the flagpole, if the number of coins on your counter has matching numbers, and if the last digit of the timer also matches that number when Mario grabs the pole, then you get a 1-Up. As a bonus, the fireworks also go off!

THE HAMMER THAT DOESN'T HURT

If Mario is all the way to the left side of the screen, the hammers might hit him, but they don't do any damage (but a tackle by the Hammer Brothers will hurt).

HARD-TO-DETECT WARP ZONES

There are normal Warp Zones in this game, but compared to the previous game, they're harder to find. Course W1-2 has a Warp Zone that sends Mario to W2, W3, and W4, but they're all hidden separately. There's also a warp in W5-1 that goes to W8, but the Warp Pipes that go to W7 and W8 are found in W5-2 (all hidden, too). A Warp Zone in WA-2 goes to WB, one in WA-3 goes to WC, and one in WB-4 warps to WD. But there are also reverse warps, so watch out!

FIREWORKS SHOW REDUX

Upon reaching the flagpole, if the last digit of your accumulated coins matches the last digit of the timer, fireworks are sent up. If the matching numbers are odd, three fireworks go up. If the matching numbers are even, six fireworks go up.

TIGHT SPACES

If the far-left side of the screen has a wall (or blocks or pipes) with just enough space for Mario to get in between, Mario gets pulled in. By jumping, you can move Mario upward, and if there's a ceiling, pressing and holding left on the +Control Pad while doing a number of jumps will reveal that he can pass right through the wall.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

One evening, Mario had a strange dream. He dreamt of a long, long stairway leading up to a door. As soon as the door opened, he was confronted with a world he had never seen before spreading out as far as his eyes could see. When he strained his ears to listen, he heard a faint voice saying "Welcome to 'Subcon,' the land of dreams. We have been cursed by Wart and we are completely under his evil spell. We have been awaiting your arrival. Please defeat Wart and return Subcon to its natural state. The curse Wart has put on you in

the real world will not have any effect upon you here. Remember, Wart hates vegetables. Please help us!" At the same time this was heard, a bolt of lightning flashed before Mario's eyes.

Stunned, Mario lost his footing and tumbled upside down. He awoke with a start to find himself

sitting up in his bed. To clear his head, Mario talked to Luigi, Toad, and Princess about the strange dream he had. They decide to go to a nearby mountain for a picnic. After arriving at the picnic

area and looking at the scenery, they see a small cave nearby. When they enter this cave, to their great surprise, there's a stairway leading up, up and up. It is exactly like the one Mario saw in his dream. They all walk together up the stairs and at the top, find a door just like the one in Mario's dream. When Mario and his friends, in fear, open the door, to their surprise, the world that he saw in his dream spreads out before them!

FEATURES

HARVESTING ACTION!

This 2D side-scrolling action game takes place in the rich dream world called Subcon. The world-view and system are a little different from the standard *Super Mario Bros.* game, and this title acts as a kind of side-story. The action of this game comes from rooting out both enemies and vegetables in a "harvesting action game." You can't jump on enemies to defeat them in this game—instead, you harvest vegetables and use them to attack. This game also introduces a life system different from the other 2D scrolling action games.

THE FOUR MAIN CHARACTERS

Four characters share in this adventure! Mario, Luigi, Princess Toadstool, and Toad each have different rates of dashing, jumping, carrying, and pulling. Since you can choose your character at the beginning of each course, you can choose the character best suited to face each particular obstacle and enemy.

SUPER MARIO USA

Released in 1988 for the Nintendo Entertainment System, *Super Mario Bros. 2* was based on the game *Yume Kōjo Doki-Doki Panic* ("Dream Factory Heart-Racing Panic"). This was the second game in the Super Mario series for American audiences, but in Japan, it was the sixth. After becoming massively popular in the US, it was finally reverse-imported to Japan in 1992. However, as there was already a game entitled *Super Mario Bros. 2* in Japan—what we know as *Super Mario Bros.: The Lost Levels*—this game was released as *Super Mario USA*.

CHARACTERS

PLAYER CHARACTERS

You can choose from a cast of four player characters, each with different abilities: jumping strength, pulling strength, carrying strength, and dash speed.

MARIO

He has average abilities all around. If he's carrying something, he's not able to jump as high as he normally would.

LUGI

When he pumps his legs, he can jump farther than everyone else, but his dashing and carrying powers are weak.

OTHER CHARACTERS

Other characters who become Mario's allies.

PRINCESS TOADSTOOL

She's rated the lowest when it comes to her carrying power and dash speed, but she can stay afloat in midair for a few seconds.

Residents of the dream kingdom that have been captured by Wart.

POWER UPS

Unlike in other games in this series, no power-up can give Mario or his friends extra abilities or a fresh, new look. However, their appearances do change depending on how many lives they have.

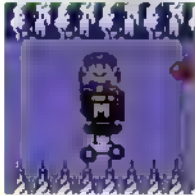

TOAD

He picks items up and dashes faster than the rest—even when carrying an item—but he can't jump very high.

MARIO ITEM MUSHROOM

His normal state. When he has two to four lives, this is how he looks.

LUIGI

TOAD

THE PRINCESS

SMALL MARIO

With just one life left, Mario shrinks! He still has the same abilities, but if he's injured or bumps into an enemy just one more time, you lose the game.

INVINCIBLE MARIO

For a limited time, Mario becomes invincible. He can defeat any enemy just by knocking into them.

This crab is the boss of W5 and is surprisingly skilled at throwing rocks.

COBRAT

This snake lies in wait in the sand or in vases, but when Mario approaches, he bursts out and launches a projectile.

Created by Wart, this fire entity is the boss of W4. He flies around spitting fireballs.

**PIANTO**

Normally dormant, this phantom mask guards keys. If Mario takes a key, it awakens and pursues him relentlessly.

**POKEY**

This walking cactus is covered in thorns. Watch out! These thorns hurt!

**POIKUPO**

His body is entirely covered with spines, so Mario can't climb on his back.

**SHYGUY (PINK)**

This foe moves back and forth on the hills, turning around when he encounters an obstacle.

**SHYGUY (RED)**

This little fellow wears a mask because he's shy. If he reaches a ledge, he just keeps on walking.

These creatures wear masks and jump before spitting a bullet. Learn the timing of the bullets to avoid them.

**SNIFIT (PINK)**

They move back and forth on the hills, turning around when encountering an obstacle.

**SNIFIT (RED)**

They shoot bullets as they move across the course. Even if they encounter a ledge, they keep walking.

**SPANK**

It moves in a circular motion around walls and floors. Some move fast, others slow.

**TROUTER**

This jumping fish can be found in rivers and waterfalls. It interferes with Mario, but can also help him cross water.

**TRYCLON**

The fireball-spitting boss of W2 and W6. Tryclyde's cunning and offensive capabilities are three times normal strength!

**TWEETER**

This mask-wearing bird has wings, but moves in short hops. Try to get on top of its head.

**WART**

This W7 boss attacks by opening his huge mouth and firing bubbles. He hates vegetables.

W7-2

An enormous Snifit palace. Mini bosses are lurking in several different places.

ITEMS & OBSTACLES

Here's a list of handy items, tools, and other interesting things that appear during this adventure. Since there aren't a lot of power-ups in this game, skillful use of the items and other features is crucial.

1-UP MUSHROOM

When a 1-Up Mushroom appears, Mario gets an extra life!

BOOM

A few seconds after they are picked up, they flicker and explode. They can be used to destroy walls or defeat enemies.

BONES

These remain sometimes handy as stabs fooling. Other times, they are swept away by the sand.

BRICK WALLS

They're blocking the way. A well-timed bomb blast or an exploding Bob-omb will open up the passage.

CHAINS

Grab on and climb up or

CHERRIES

Collect five cherries to earn a Starman.

COINS

Using the coins collected in Sub-Space, try your luck on the Bonus Game to win extra lives.

CONVEYERS

Get on, and Mario is automatically sent in one direction. There are left-moving types and right-moving types.

CRYSTAL BALL

Pick up a crystal ball upon defeat. Sometimes they're just left on a pedestal!

GRASS

Found here and there on every course. Harvest it to find items.

KEY

Mario needs this to open locked doors. His running speed does not change even if he is carrying a key.

LADDER

Grab on to one to climb up or down. They may be connected to a different area.

LOCKED DOORS

Mario can't open these doors unless he is holding the key.

LOG

They appear falling down with the flow of a waterfall. Mario can use them to get across.

MAGIC POTION

Throw a magic potion and a door appears. Going through the door will take Mario to Sub-Space.

MASK GATE

Pick up a crystal in order to pass through the gate. Entering usually means you've cleared the course.

MUSHROOM BLOCKS

They can be used as steps or for attacking the enemy.

MUSHROOMS

These appear when you warp to Sub-Space at a certain spot. At full health, Mario's life meter increases by one.

POW BLOCK

When Mario throws this the earth shakes and all on-screen enemies are defeated.

QUICKSAND

If Mario steps in it, his body starts to sink little by little. One type of sand has a much faster flow.

ROCKET

They sometimes appear when harvesting grass. Mario automatically boards it and blasts off to a new area.

SAND

Pyramids and desert courses feature lots of sand. Mario can dig down through it.

SMALL HEART

This item appears when eight enemies have been defeated. The life meter recovers by one.

SMALL VASE

These pots produce enemies, one after the next. Mario can't go inside them.

SPIKES

If Mario touches these, he takes damage. He can ride enemies, like Shyguya, to make his way across.

STARMAN

A Starman will appear when Mario collects five cherries. Grab it to become invincible for a short time.

STOPWATCH

This handy item appears when five ripe vegetables have been picked. It freezes enemies for a short time.

TURTLE SHELLS

When thrown they skim along the ground and hit anything in their path.

UNRIPE VEGETABLES

They are not fully grown, but can still be used to defeat enemies.

VASE

Mario can enter these, although some of them house Cobrats.

VEGETABLES

Ripe vegetables. If Mario harvests five, a stopwatch appears.

VINES

Mario can climb up or down vines. Hoopsters sometimes live on them, blocking the way.

WHALES

They live in the water and Mario can walk on their backs. Every now and then they spout water.

AND MORE

MEMORABLE MOMENTS

This game is quite different from all other games in this series. Here are several notable scenes to illustrate why.

MUSHROOMS IN SUB-SPACE!

When Mario throws a magic potion and creates a door, he enters Sub-Space, a dark, mirrored version of the dream world. Coins and 1-Up Mushrooms can be found there. The location of mushrooms is pre-determined, so you have to be clever about where to open the door. By the way, the background music in Sub-Space is the same as the standard above-ground music in *Super Mario Bros.*

PLAY THE SLOT MACHINE!

After clearing a course, you can use the coins you've collected in Sub-Space to play the slot machine. With the proper combinations, you earn bonus lives.

THE WINNER IS...

At the end of the game, you can see how many courses each character cleared. The one with the most courses is crowned the biggest "Contributor"!

POW/PACKS A PUNCH!

The POW Block, which made its appearance in the NES version of *Super Mario Bros.*, reappears here as a usable item. It hasn't changed much—it still takes out all the on-screen enemies in a single blow. It later reappears in *New Super Mario Bros. 2*, *Super Mario 3D World*, and many others.

JUST A DREAM?

After the game's end, all of a sudden you see Mario asleep in bed. It's possible that the dream country, Subcon, has all just been a part of Mario's dream.

HELPFUL HINTS & TECHNIQUES

Here are some helpful techniques to use during this unique adventure! In particular, this game has a very distinctive warping method. Although you can warp throughout the series, the technique for this game is completely its own.

A WARP ZONE... IN A VASE?

Certain vases send Mario to Sub-Space, then warp him. A vase in W1-3 sends him to W4, W3-1 sends him to W5; W4-2 sends him to W6, and W5-3 sends him to W7. It's possible to warp in those four locations.

SELF-DESTRUCT!

When Mario's in his victory pose, grab controller two and press up on the +Control Pad, A, and B Buttons all at the same time. As a result, you'll lose all your remaining lives. There are times when you find you're stuck in a course and can't advance, but this method is useful when you want to start the game over completely from the beginning.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

Once upon a time, there was a peaceful world called Sarasaland. In this world there were four kingdoms named Birabuto, Muda, Easton, and Chai. One day, the skies of Sarasaland were suddenly covered by a huge black cloud. From a crack in this cloud, the unknown space monster Tatanga emerged to try to conquer Sarasaland. Tatanga hypnotized the people of all the kingdoms so that he could control them in any way he liked. In this way he took over Sarasaland. Now, he wants to marry Princess Daisy of Sarasaland and make her his queen.

Mario came to know of these events, and has started on a journey to the Chai Kingdom where Princess Daisy is held captive, in order to restore peace to Sarasaland.

Can Mario defeat Tatanga, release the people from his interstellar hypnosis, and rescue Princess Daisy? It's all up to you and Mario's skill. Go for it, Mario!!

FEATURES

HANDHELD GAMING

This game was released as a launch title for the Game Boy, and it was the first handheld Super Mario game. It was presented as a new type of action game, different from the console games. The new world for Mario's adventure was a little different from the Mushroom Kingdom!

SAVE SARASALAND!

The stage for this adventure is Sarasaland. The interstellar alien Tatanga has abducted Princess Daisy, and in order to rescue her, Mario must face challenges in four different kingdoms. Throughout the game, Mario must use vehicles, including an airplane, and make his way through a shooting challenge. Even on a small black-and-white screen, a huge adventure awaits, taking you through the land, sea, and air!

CHARACTERS

PLAYER CHARACTERS

The skeleton that's left after Tatanga eats a Torion. It jumps up out of the water.

KING TOTOMESO

Boss of the Birabuto Kingdom. It jumps up and down while spitting fireballs.

These spiders live in caves. They make small jumps to get to Mario.

The first level has pyramids in the background. Traverse hills filled with Chilibboes.

W1-2

There's no ground here! Cross wooden platforms and dodge the Bumbuna attacking from above.

W1-3

The interior of a pyramid, filled with traps. The crumbling ceiling blocks the way for intruders.

Spicoriko enemies, including Sou and Kuno, are plentiful in this cave.

W3-3

A shrine in the sky, with lots of lifts. Hiyoiwi waits at the end.

W4-1

Pipes line this level that resembles a bamboo grove. Pinpas jump around, too.

W4-2

There are lots of small platforms and Pompo Flowers here. The passage gets very tight in the second half, with a lot of Roto-Discs.

W4-3

The last level is a final battle above the clouds. Use the Sky Pop to scatter enemies in Mario's path.

ITEMS & OBSTACLES

You'll encounter all of these on your journey. The 1-Up isn't a mushroom this time—it's a heart! There are a lot of other unique items in this game, too.

? BLOCK

A block with a question mark on it. You can get coins or items out of them.

1-UP HEART

Grab one for an extra life. Most of them are well-hidden.

BLOCK

Mario can break them if his fire is powered up. Sometimes there are items inside.

BOSS SWITCH

Sneak behind the boss and jump on the switch to defeat it.

COIN

With every hundred you collect, you get a 1-Up. Mario can gather them with a superball, too.

ELEVATOR

When Mario climbs on, it rises straight up. Sometimes they emerge from hidden blocks.

FALLING CEILING

These blocks fall from above when Mario gets close. If one hits he'll take damage.

FALLING PLATFORM

SUPER MUSHROOM

Use this to power up to Super Mario!

SUPERBALL FLOWER

This is the power-up that makes Superball Mario!

AND MORE

This game definitely has some unique worlds! Still, there are familiar features from the previous *Super Mario* games.

When Mario becomes Invincible Mario, the music that plays comes from the classic *Orpheus in the Underworld* by Jacques Offenbach, most famous as the Cancan music, after the French cabaret dance.

In W2-3 and W4-3, Mario must board a vehicle and fire projectiles to defeat enemies in courses that play like shooting games. The final confrontation with Tatanga is also a shooter, as Mario fires missiles at his spaceship while dodging his attacks.

In W4-2, there's a hidden room which fills the screen almost completely full of coins. Superballs are required to get them all.

There are two entrances to the goal area, and if Mario enters the top door, you can play a bonus game. If you manage to stop with good timing, you might get a 1-Up, a 2-Up, a 3-Up, or even a Superball Flower!

This game is the very first appearance of Daisy, the princess of Sarasaland. But in the Birabuto, Muda, and Easton Kingdoms, each has an enemy disguised as Daisy to confuse Mario.

After Mario defeats Tatanga, the Mushroom Castle on the title screen turns into a Mario Castle and he can enter a world with a lot more enemies than before. Gaos now appear in W1-1, for example, so the difficulty has been greatly increased.

HELPFUL HINTS & TECHNIQUES

Here's some useful information that might help you enjoy the game more. Some of these techniques can't be used until specific conditions are met.

CONTINUE

Once you've cleared the Hidden World, you can select and access any course from the title screen.

CONTINUE

After you score over 100,000 points, you'll unlock the option to continue your game.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

The Mushroom Kingdom has been a peaceful place thanks to the brave deeds of Mario and Luigi. The Mushroom Kingdom forms an entrance to the Mushroom World where all is not well.

Bowser sent his seven children to make mischief as they please in the normally peaceful Mushroom World. They stole royal magic wands from each country in the Mushroom World and used them to turn their kings into animals. Mario and Luigi must recover the royal magic wands from Bowser's seven kids to return the kings to their true forms.

"Goodbye and good luck!" said the Princess and Toad as Mario and Luigi set off on their journey deep into the Mushroom World.

FEATURES

A BIGGER GAME!

In the third installment of the NES series, there's more of everything: enemies, power-ups, and courses! In addition to the familiar characters that you know and love, this game features some new faces: the seven Koopalings, Bob-ombs, and Boo! There are also new obstacles, including the Koopa crew's airships.

With the introduction of Raccoon Mario, you can now fly through the sky, further expanding Mario's capabilities. *Super Mario Bros. 3* was a big technical step forward, at a then-huge three megabits.

INTRODUCING THE WORLD MAP!

This game introduces a powerful new world map! Now you can see a clear path toward each castle. The map also pinpoints the Toad Houses, where you can get items. But the biggest advantage is the power-ups: you can trigger them right on the map, so that you start a new course already powered-up!

CHARACTERS

PLAYER
CHARACTERS

The two brothers, Mario and Luigi, go on adventures in the Mushroom World.

OTHER
CHARACTERS

Allied characters who appear in the story.

MARIO

Player One's character. You can identify him by his red shirt and hat.

LUIGI

Player Two's character. His green shirt and hat are his trademarks.

THE PRINCESS

Princess of the Mushroom Kingdom. She sends you a letter and items each time you rescue a royal.

TOAD

Servants of the royal houses in each country. You can get useful items from Toad Houses!

THE KINGS

Each country is ruled by a king, but they've been transformed by the bullying Koopas.

GRASS LAND

DESERT LAND

WATER LAND

GIANT LAND

SKY LAND

ICE LAND

PIPE LAND

POWER
UPS

Certain items transform Mario and give him special powers. If he takes damage from an enemy while powered up, he turns back to normal.

MARIO

This is Mario's state when the game begins, also known as Small Mario or Regular Mario. He can't break brick blocks.

SUPER MARIO

ITEM: SUPER MUSHROOM

With the help of a Super Mushroom, Mario's body becomes bigger. Now he can break brick blocks.

FIRE MARIO

ITEM: FIRE FLOWER

Fire Mario can attack enemies by throwing fireballs at them. He can also destroy ice blocks with fireballs.

RACCOON MARIO

ITEM: SUPER LEAF

Raccoon Mario has some new moves: the tail attack and the ability to fly!

INVINCIBLE MARIO

ITEM ◊ STAR MAN

For a short while, Mario can defeat any enemy just by touching it. Also, his jumping is different from other powered up versions of Mario: he somersaults through the air.

TANOOKI MARIO

ITEM ◊ TANOOKI SUIT

This suit gives Mario all the powers of Raccoon Mario, plus the ability to turn into a statue! If he pounds the ground while in statue form, it creates a very strong attack that defeats several enemies at once.

FROG MARIO

ITEM ◊ FROG SUIT

This item allows Mario to easily swim through the water. Simply use the +Control Pad. When you press the A Button, Mario swims faster and it's even possible to swim against the current. But Frog Mario is not so good on dry land.

HAMMER MARIO

ITEM ◊ HAMMER SUIT

Mario can throw the hammer as an attack. Hammers fly in an arc, so he can defeat many enemies that can't be reached with fireballs. Also, the shell hat and shell on his back help protect against fire attacks when he squats down.

SHOE MARIO

ITEM ◊ KURIBO'S SHOE

Kuribo's Shoe only appears in W5-3. If Mario hits the Goomba that is wearing Kuribo's Shoe from underneath, he can steal the shoe, and then stomp on nearly all enemies and walk over Munchers. Once you finish the course, the transformation dissolves.

WING MARIO

ITEM ◊ WING

This is an Item you can use on the world map. This bumps the power meter up to max all the time, so Mario can fly continuously. But once you've cleared the level, the wing's effect wears off, and Mario becomes regular Raccoon Mario.

ENEMIES

These are the enemy characters Mario meets throughout the Mushroom World. This is the first appearance for Boos, Chain Chomps, and many others!

An extremely shy ghost. But turn your back, and it's on the attack!

BOOM BOOM

This boss controls the mini-fortress in each world. His attack is different based on where you meet him.

These enemies throw boomerangs instead of hammers. Watch out for the boomerangs on their way back!

BOSS BASS

It swims along the surface of the water and attacks by jumping. If found underwater, call them Big Berthas.

BOWSER THE KOOPA KING

Bowser is once more the source of Mario's troubles. Can Mario defeat him again?

BUZZY BEETLE

They cross the ground in big, leaping bounds, flying toward Mario to attack!

KOOPA PARATROOPA (RED)

They fly back and forth. If Mario jumps on one, it becomes a normal Koopa Troopa.

AND MORE

MEMORABLE MOMENTS

These are some of the new features and visuals that left an impression. A lot of these are things that you might never notice just playing the game casually.

LAY OF THE LAND

New landscapes have been added, including slopes! The hills and valleys create a much richer-feeling world. Mario can also defeat enemies by sliding down inclines.

SCROLLING LEVELS

They scroll up, down, and even diagonally. For the first time, a course scrolls even when Mario stays still. That means you can't get too far ahead, or backtrack. If Mario gets caught between a difficult obstacle and the end of the screen, you'll lose a life.

GOAL CARDS

Each time you reach the goal at the end of a course, you collect a card. Try to get three of a kind! A set of mushrooms gives you two extra lives, flowers give you three, and stars give you five. If you can't make three of a kind, you just get a 1-Up.

ANGRY SUN ON THE ATTACK

At first, the sun in the sky in Desert Land looks like part of the background. But in the second half of the level, it swoops down to attack! Defeat the Angry Sun by hitting it with a shell.

RELEASE THE CHAIN CHOMPS!

Usually, Chain Chomps are tied in place . . . but if you wait too long, the chain breaks and they get to wander free.

NOSTALGIA BROS.

In the two-player version, if you line up Luigi (or Mario) at the top of the world map screen and press the A Button, you get the good old *Mario Bros.* game! The screen converts into the old Mario Bros. motif, and you can both play this minigame at the same time. Defeat five enemies or outlast your opponent to win. The winner chooses the next spot on the map. It's also possible to attack your opponent or steal their goal cards.

A MAP OF JAPAN

The last section of Water Land is a set of islands that's shaped a bit like Japan. The castle is about where Kyoto would be (and that's where the Nintendo headquarters is located!). And the king looks suspiciously like Mario . . .

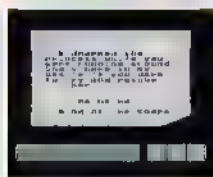

ROCK BREAKER

There are rocks on the world map that block Mario's way, but you can break them using the hammer. You might find a shortcut, or even a hidden Toad House.

ANOTHER ROYAL KIDNAPPED!

Princess Toadstool asked Mario and Luigi to rescue the kings, and she sent letters with items as a reward. But after you clear World 7, a letter arrives to let you know that the Princess has been kidnapped. Mario and Luigi must head to Bowser's castle to rescue her.

HAMMER SLIDE!

Normally, Hammer Mario can't slide. But if you happen to get the Hammer Suit while you're already sliding, you can see what kind of pose Hammer Mario would strike mid-slide.

THE KING'S SPEECH

If you defeat a Koopaling as Tanooki Mario, Frog Mario, or Hammer Mario, the rescued royal's dialogue will change depending on the suit Mario is wearing.

HELPFUL HINTS & TECHNIQUES

These techniques will aid you on your quest. Also, some hidden parts of the game won't appear until certain conditions are met.

HIDDEN HOUSES

On some courses, if you collect a certain number of coins, a white Toad House appears on the world map. The minimum numbers are: W1-4 (44 coins), W2-2 (30 coins), W3-8 (44 coins), W4-2 (24 coins), W5-5 (28 coins), W6-7 (78 coins), and W7-2 (78 coins). You get P-Wings from odd-numbered worlds, and Anchors from even-numbered worlds.

WARP WITH A WHISTLE

When you use the Warp Whistle, Mario flies to W9, the Warp Zone. Here, you can warp to other worlds. Depending on the world in which you used the whistle, your options are different. From W1, you can go to W2, W3, or W4. From W2 through W6, you can go to W5, W6, or W7. From W7 through W9, you can warp to W8. You can find Warp Whistles in W1-3, W1-Fortress, and with the Fire Bros. in W2.

GOOMBAS' BLOCKS DON'T SHINE!

The blocks that Pile Driver Micro-Goombas hide behind look just like regular brick blocks, but if you look closely you can tell them apart. Regular blocks reflect light, and the Goombas' blocks don't. And if you pause the game, the Goombas' blocks disappear.

A MYSTERIOUS WHITE BLOCK

If Mario squats on certain white platforms, he can go behind the background, where enemy attacks can't hurt him. There are five places where you can do this: W1-1, W1-3, W3-10, W5-7, and W7-8. If you continue behind the scenes in W1-3 all the way to the goal, you can get yourself a Warp Whistle.

N-MARK SPADE PANELS

In every world, an N-Mark Spade Panel appears if you get a score over 80,000. Play a game of concentration and match cards to get more items.

TREASURE SHIPS FOR MAXIMUM COINS

When you clear a course, if the tens and ones digits of your coin counter are the same, and they also match the tens digit in your score, then the Hammer Bros. space on the world map turns into a Treasure Ship. There are 188 coins on each ship. Each ship also houses a set of Boomerang Bros.—if you defeat them, you get an item.

SAFE UNDER BOWSER'S FEET

In the final battle, Bowser pounds the ground and breaks the bricks there. When Bowser comes down on the blocks, Mario can squat and avoid taking damage. But be careful, because he is still vulnerable to Bowser's fireballs!

BONUS BROS.

If the Hammer Bros. are in a certain place on the world map, you can find a brick block that contains a power-up.

INTRODUCTION

SITORY

*This text is taken directly from the instruction booklet.

After saving the Mushroom Kingdom from Bowser and the rest of the Koopas in *Super Mario 3*, Mario and Luigi needed to recuperate from their adventures. Together they agreed that the best place to vacation was a magical place called Dinosaur Land.

But while Mario and Luigi reclined on the beach for a relaxing nap, Princess Toadstool disappeared, apparently seized by evil forces. After searching for

hours for their missing friend, Mario and Luigi came upon an enormous egg in the forest.

Suddenly the egg hatched, and out popped a young dinosaur named YOSHI, who proceeded to tell Mario and Luigi a sad tale of how his dinosaur pals were sealed in similar eggs by a group of monstrous turtles.

"Monstrous turtles!" exclaimed Luigi.

"Bowser and his bunch have returned!" Mario slowly nodded his head in agreement and, along with Luigi and Yoshi, set off across Dinosaur Land to find the Princess and to free Yoshi's friends. As they began their journey, Yoshi handed Mario a beautiful cape. "This may help you," Yoshi said. "Some say it has magical powers."

With a little luck (and help from a magic cape), our hearty crew can defeat the seven worlds of Bowser's Crazy Koopa Kritters. Many locations are well-hidden so explore everywhere and try everything. Not all locations have to be explored to rescue the dinosaurs and save Princess Toadstool, but there are many "starry" treasures to be found in far-reaching places. You'll need to search all areas to find out what kinds of treasures are there...in *Super Mario World*.

FEATURES

AN ADVENTURE IN DINOSAUR LAND

A side-scrolling 2D action game that went on sale at the same time as the Super Nintendo Entertainment System, or SNES, this adventure takes place in the lush, sprawling Dinosaur Land! Joining Mario on this epic journey is a brand new friend, a dinosaur named Yoshi. The SNES has a power-up for both graphics and music, which give you a far richer and more vivid environment. It also includes a backup feature that allows you to save your games mid-adventure!

CAN DINOSAUR LAND BE . . . ALIVE?

The setting for this adventure is Dinosaur Land, a weird and wonderful island that could very well be alive. Mountains rise higher, bridges suddenly appear, and as your adventure proceeds, the lay of the land changes. In this game, there aren't any specific "worlds." Instead, Mario wanders through a large island with interconnected areas like the Donut Plains and Vanilla Dome. Along the way, Mario may sometimes find keys that open up paths to secret goals. As these routes are uncovered, you can chart a path to Bowser's Castle that is all your own!

YOSHI: YOUR NEW BEST FRIEND!

This game marks the first appearance of Mario's new friend and fellow adventurer, Yoshi! Acting as Mario and Luigi's trusty steed, he can eat enemies and fruit by lashing out his long tongue. Yoshi has since appeared in many of Mario's adventures. He also became a very popular character who starred in his own spinoffs, such as *Yoshi* and *Yoshi's Story*.

**SPIKED PILLAR**

They slam down with force! If Mario touches one, he takes damage.

**SPOT LIGHT**

It shines, illuminating the area around Mario. If you hit the block, it flashes.

**SPRING BOARD**

Jumping on these boards launches Mario into the air. The closer Mario is to the end of the board, the higher he jumps.

**STRETCH BLOCK**

They stretch out into a wide platform, then shrink again at set intervals. Some stretch horizontally and others vertically.

**STRONG CURRENT**

Water flows strongly in one direction, rising and receding as Mario proceeds.

**SUPER MUSHROOM**

With this, you can power up to Super Mario. You can stack up with an extra.

**SUPER STAR**

They make Mario invincible.

**SWINGING PLATFORM**

Plats that rotate. Some plats only move when Mario jumps on board.

**TRIANGULAR BLOCK**

These allow Mario to run up walls. If Yoshi steps on one, he jumps high into the air.

**VINE**

A beanstalk appears from the block and stretches up to the sky. Mario can grab on and climb up.

**YOSHI'S EGG**

There's always something fun inside one of these! If the Yoshi you are riding lays an egg, you get a special item.

**YOSHI'S WINGS**

These wings allow Yoshi to fly.

AND MORE

MEMORABLE MOMENTS

Unforgettable scenes, updated features, and the first appearance of a brand-new friend, Yoshi! Here are some of the most noteworthy highlights from the game.

MEET YOSHI

Mario's adventure kicks off at Yoshi's home. A message block lets you know that he's off on a journey, but the first time you actually see Yoshi is on Yoshi's Island Course 2.

SCAREDY YOSHI

Yoshi doesn't accompany Mario into ghost houses, fortresses, or castles. He patiently waits for his friend outside.

POCKETS ON MARIO'S BUTT!

In this game, getting a view of Mario's rear end—especially when he's climbing chain-link fences—reveals that there are pockets on his overalls.

BONUS GAMETIME

If Mario crosses the goal tape at the very top, he gets fifty bonus stars and a 3-Up. When he crosses the goal with more than a hundred bonus stars, the bonus game starts. Whenever three of the same image line up either vertically, horizontally, or diagonally, he receives a 1-Up Mushroom.

KOOPAS ON TWO LEGS

This is the first game that depicts Koopas walking on two legs. When Mario jumps on them, the Koopas are ejected from their shells. This game also features four shell colors, and each has special properties. There's a lot to learn about Koopas in this game!

RIDE ON LAKITU'S CLOUD!

If Mario defeats Lakitu by hitting him from below with an empty Koopa shell, the Lakitu falls, but the cloud remains. Then he can board the cloud and ride on it. This feature was passed down to the *New Super Mario Bros.* series.

THE BIG BOO PEEKS

Like all the Boo Buddles, the Big Boo gets really shy when Mario turns to face him. But if he keeps looking, for just a moment, Big Boo will lower his hands and glance to see what he is doing.

MARIO EXPERTS ONLY!

Upon finding the hidden goal in Star World Course 5, Mario can go to an even harder Special World. If you wait a while on the Special World map, you begin to hear a new arrangement of the original *Super Mario Bros.* above-ground background music.

LOOK FAMILIAR?

When you look at the title screen of the game, the course from Star World Course 5 is the course that plays there. You don't see this from just looking at the title screen, but the second half of the course is filled with Pokeys.

WELCOME TO WONDERLAND

When you clear all the courses in the Special World, you gain access to the secret world. The colors of Dinosaur Land change, and some of the enemy graphics change, too. The Koopas are all wearing masks that look like Mario!

HELPFUL HINTS & TECHNIQUES

Here are some techniques to help you get through Dinosaur Land! The button instructions refer to the SNES, for which the game was originally intended.

THE WRIGGLER STEP SEQUENCE

In the Forest of Illusion, there are a series of Koopas and Wrigglers. If Mario steps on the Wrigglers enough, not only do their expressions change, so do the sprites representing 1-Ups. This action gives you additional lives and increases your coin score at the same time.

THE MATERIALIZING 1-UP MUSHROOM

When Mario goes through certain areas or makes a full revolution around certain blocks, suddenly a 1-Up Mushroom will appear out of nowhere. There are fourteen locations for this in all.

THE REGENERATING P SWITCH

P Switches normally vanish when Mario steps on them. However, if Yoshi accompanies Mario, he can quickly eat the P Switch immediately after Mario steps on it, but before it disappears. Yoshi can then spit a fresh P Switch out, ready to be switched again.

A PERFECT SCORE . . . 96!

The number next to your save file is the number of goals you've been through, including both normal and hidden goals. Courses with both a regular goal and a hidden goal get you two more. After going through all of the goals, the highest number you can get is 96.

CAPE FLYING 101

While Mario is flying with the cape, you can press the X Button (or if you're flying using the X Button, then press the Y Button) to change Mario's direction. Additionally, if you press the B Button, it will slow Mario's flight every time you press the button.

THREE IN A ROW!

If Mario can change the blocks in the bonus area so that all three are reading "O" marks, you get a 1-Up Mushroom. It's hard to get it right by attacking them the regular way, but if Mario uses a cape twirl attack from the left side of the block, the correct symbol appears.

MARIO'S JUGGLING ACT

Mario can carry items and climb vines, but usually not both at the same time! However, by throwing an item into the air and climbing a vine while holding the Y Button, he can accomplish this feat. Mario will catch the item and climb the vine while holding it.

FIND THE TOP SECRET AREA

Clearing the hidden goal in the Donut Plains Ghost House opens the way to the Donut Plains Top Secret Area. It's a small, one-screen course with nothing more than some Prize Blocks containing a Yoshi and power up items. Simple, yet effective!

ITEM SWAP!

If Mario is holding items such as a shell or a P Switch when he crosses the Giant Gate, they change to a power-up item. What they change into depends on how Mario is powered up at the time. Additionally, if Mario goes through the Giant Gate as Balloon Mario, an item appears out of thin air.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

Danger! Danger!

While I was away crusading against the mystery alien Tatanga in Sarasaland, an evil creep took over my castle and put the people of Mario Land under his control with a magic spell. This intruder goes by the name of Wario. He has been jealous of my popularity ever since we were boys, and has tried to steal my castle many times. It seems he has succeeded this time.

Wario has scattered the 6 Golden Coins from my castle all over Mario Land. These Golden Coins are guarded by those under Wario's spell. Without these coins, we can't get into the castle to deal with Wario.

We must collect the 6 coins, attack Wario in the castle, and save everybody!

FEATURES

MARIO VS. WARIO

This is the second game in the *Super Mario Land* series, which started with the release of the Game Boy system. After the previous game, Wario took over Mario's castle and now Mario's on a quest to get it back. To do so, he'll have to collect all six golden coins, which will become the keys to victory! Mario must defeat the boss characters of all six zones. You can begin the adventure anywhere you like.

NEW FEATURES

The character sprites are larger than those in *Super Mario Land*, and the setting feels a lot closer to *Super Mario World*. Other features include a world map and the ability to save—this game has evolved for a new age! On the other hand, you don't get a 1-Up just for collecting one hundred coins. Still, it's equipped with an easy mode and has many other unique features.

CHARACTERS

MARIO

PLAYER CHARACTERS

This game follows the tradition set by *Super Mario Land*, making it a solo adventure for Mario.

POWERUPS

Some special items grant unique abilities. In certain areas, they take on unusual shapes.

MARIO

This is how Mario starts the game. He cannot break blocks or perform a spin jump.

SUPER MARIO

ITEM MUSHROOM

This allows Mario to break blocks with moves like the spin jump. If Fire Mario or Bunny Mario grab a mushroom, they'll turn back into Super Mario.

FIRE MARIO

ITEM FIRE FLOWER

He can attack enemies with fireballs and break fire blocks. You can identify him by the feather in his cap.

INVINCIBLE MARIO

ITEM STAR

WHALE COURSE

Mario goes inside the whale. Lots of sharp ribs poke out from above and below.

SECRET COURSE 6

Coins are lined up to form letters. Read the message as Mario moves through.

WARIO'S CASTLE

Once Mario's gathered all six coins you can enter the final battle.

INSIDE WARIO'S CASTLE

There are three levels. The traps and enemies change from one room to the next.

ITEMS & OBSTACLES

Here are some of the items and other elements that appear in the levels. This game feels very different from *Super Mario Land*, but the fact that the 1-Up is a heart is the same.

? BLOCK

Most hold coins or items, but some contain a Jack-in-the-Box.

1-UP HEART

They give you an extra life.

3-UP HEART

Find them in the bonus games. When you get one, you gain three lives.

ARROW BLOCK

Get on and Mario moves in the direction of the arrow. They point either left or right.

BILL BLASTER

Two-barrel cannons that fire Bullet Bills toward Mario.

BLOCK

Small Mario can't break these, but any other Mario can. Sometimes they hold items.

BONE BLOCK

When Mario steps on, it starts to crumble.

BONE LIFT

A platform that starts to fall as Mario steps on. Sometimes it rises a bit before the fall.

BONUS BELL

If Mario rings the bonus bell before reaching the goal, you get to play the bonus game.

CARROT

These turn Mario into Bunny Mario.

CHAIN BALL

When Mario steps on, it starts moving. It follows the chains in a zigzag motion.

MID-POINT BELL

If Mario rings it then loses a life you start again at the bell rather than the course start.

CLOUD LIFT

Clouds that move right and left. Mario can hop on and ride them.

COIN

You can collect up to 999 to use in the slot game.

CONVEYOR BELT

Step on and they take Mario a short distance. Some go right, while others go left.

CRANE

If Mario stands below, it will pick him up and carry him along the track.

FIRE

You'll find it on some courses. If Mario touches it, he'll take damage.

FIRE BLOCK

They can only be destroyed by Fireballs. Some contain items.

FIRE FLOWER

Mario can use this to turn into Fire Mario.

FIRE PIRANHA PLANT

They come in two different sizes, and spit fireballs from their mouths.

FLASHING BLOCK

They vanish sometimes, but Mario can stand on them even when they're invisible.

GEAR (HORIZONTAL)

If Mario gets on, he's moved left or right. If he stays too long, they fall.

GEAR (VERTICAL)

When Mario stands on one, he moves down. If he goes below halfway, he falls off.

GOAL

The official end of the course. There's usually a bonus bell nearby.

GOLDEN COIN

Defeat each zone's boss to collect all six and enter Wario's Castle.

HIDDEN BLOCK

They appear out of nowhere. Some contain items.

HIDDEN GOAL

This door marked by a star allows you to reach a hidden course.

HIPPO STATUE

Bubbles come out of its nose. Touch one to become Bubble Mario.

LANCE

They move in a set rhythm. If Mario touches one, he'll take damage.

LAVA

It appears in the Manhole Course and in Wario's Castle. If Mario touches it, he'll lose a life.

LIFT

These thin platforms start to move once Mario boards them. Sometimes they fall instead.

LIGHT BULB

They appear in Wario's throne room. They swing left and right, then fall when Mario stomps.

MONEY BAG

Bags that hold fifty coins. Most of them are hidden.

MUSHROOM

Grab one and power up to Super Mario.

PIPE

Some hide Piranha Plants, but Mario can move through others.

PROPELLER LIFT

They move right or left. Stand on top and it carries Mario. They're narrow but can move very fast.

SAP

Mario's movement slows when he's in sap. Bounce across the top with a series of jumps.

SPIKED BALL

They cause damage if Mario touches one. Some are up in the air.

SPIKES

Touch them and he'll take damage. They look different depending on the area.

STAR

It powers you up to Invincible Mario. Find one by defeating one hundred enemies.

WITCH'S CAULDRON

Find them when you battle the Witch. After a fire is lit below, it overflows and the lid flies up.

AND MORE

Here are some of the scenes that made a strong impression, as well as other features unique to this game. We haven't forgotten that this is the first appearance of Wario!

PLAY THE CASINO

In most other games in the series, collecting one hundred coins will grant you a 1-Up. In this game, there are four kinds of slot machines to play: thirty coins, fifty coins, 200 coins, and 999 coins. The items you receive vary between the machines.

GRAB SHELLS AND WEAR THEM!

In this game, when Mario picks up a shell, he doesn't hold it in his hands—he places it on his head. If he jumps and hits a block with a shell on his head, the shell vanishes.

MARIO'S FIRST MOONWALK

The Space Zone is the first time in the series that Mario goes into space. He wears a space suit and moves along in low-gravity jumps.

TWO BONUS GAMES

In most of the courses, there's a bonus bell just before reaching the goal. If Mario rings it, you get to play a bonus game. One is a crane game, where you have to time it just right to pick up an item. The other is a follow-the-path game. The more items you already have, the more 3-Up hearts are available in the crane game.

REMATCH WITH TATANGA!

In *Super Mario Land*, the final boss was Tatanga. He returns here as boss of the Space Zone! He's exchanged Pagosu for a new machine, and he's ready for a rematch with Mario!

SPOOKY MUSIC

In the Pumpkin Zone's Haunted House stage, the background music is a rearrangement of the coin room music from *Super Mario Land*. This is the only course in the game with that music.

THE N&B BLOCK

In the Block Course in the Mario Zone, "N&B" is written on one brick. It's a reference to a series of block-based toys that Nintendo put out starting in 1968.

MARIO'S DEBU

This is the first appearance of the self-proclaimed "greatest rival to Mario," Wario. He becomes a main character in *Super Mario Land 3: Wario Land*. After that, he continues as the lead character in the Wario Land series. Witness here the start of Wario's constant quest for coins and a castle.

A CHANGING MAP

Every Zone has secret courses (with the exception of the Mario Zone). When you clear one and then go back to the map, you may notice a change. In the

Pumpkin Zone, for example, the pumpkin's eyes have pupils and Boos come out to dance.

BOMB MARIO?!

On the File Select screen, if you press the "clear" button, Mario's body transforms into a bomb. If he enters a pipe in that form, the corresponding save file is erased.

HIDDEN BACKGROUND MUSIC

If you leave the Game Over screen as it is for about two and a half minutes, strange music will start playing. The melody is used as a hidden BGM in other games and is not limited to the Mario series.

HELPFUL HINTS & TECHNIQUES

This is the only game in the series with an Easy Mode, but you might still want to know these tricks for your adventure.

EASY MODE

If you press the Select Button on the File Select screen, Mario becomes small and the game is now set in Easy Mode. There are fewer enemies and the traps become slower and easier to handle.

DEMO PLAY

On the title screen, if you press certain buttons along with Select, you can play on the Demo Screen. Pressing up on the +Control Pad sends you to the Gate Course. Up and A together unlocks the Bubble Course. Up and B together will get you to the Cheep Cheep Course. And pressing Up, A, and B, as well as Select, takes you to the Manhole Course.

SPIN-OFF GAMES

LUIGI

Usually Luigi is lost in the shadow of his big brother, Mario. But that all changed with a game called *Luigi's Mansion*, which debuted in 2001 for the Nintendo GameCube console. This time around, Mario is lured and captured inside a creepy mansion estate, so Luigi must face his fears to go on an ever-expanding adventure. Luigi is armed with a ghost vacuum cleaner—the Poltergust 3000—a weapon developed by Professor Elvin Gadd, the ghost scientist. Fun fact: it was Professor E. Gadd who developed “F.L.U.D.D.” for Mario in the Nintendo GameCube game, *Super Mario Sunshine*.

In 2013, the next game in the series, *Luigi's Mansion: Dark Moon*, debuted for the Nintendo 3DS system. 2013 marked thirty years since Luigi was introduced, and to commemorate it, he starred in *New Super Luigi U* for the Wii U console as the main character.

PEACH

Princess Peach was a playable character in *Super Mario Bros. 2*, but her first turn as the main character wasn't until 2005 when *Super Princess Peach* debuted on Nintendo DS. In this 2D scrolling action game, it was up to Peach to rescue Mario and Luigi—turns out, it was their turn to be kidnapped by Bowser! In her great efforts to rescue Mario and Luigi, she commanded her emotional powers, or Vibes, in order to power-up. She faced the ever-expanding adventure with her parasol partner, Perry.

TOAD AND CAPTAIN TOAD

The first time Toad was the main character of a story was in 1994 when *Wario's Woods* was released for the NES and SNES. It was a puzzle-action game in which Toad had to fight monsters to save the Peaceful Woods from the iron clutches of Wario. Toad makes good use of the experience he earned in *Super Mario Bros. 2*, using his abilities to throw enemies, bombs, and other things.

Captain Toad—not to be confused with Toad himself—made his first appearance in *Super Mario Galaxy*, but he became the main character in the 2014 Wii U adventure game *Captain Toad: Treasure Tracker*. In it, Captain Toad and Toadette wandered through what appeared to be miniature garden dioramas in search of Power Stars. Its story is closely connected to *Super Mario 3D World*, and in certain portions the power-ups and enemies are the same.

YOSHI

It was only one year after Yoshi's debut in *Super Mario World* before he starred as the main character in his own self-titled adventure, *Yoshi!* After that, Yoshi is hard at work in puzzle games such as *Yoshi's Cookie* and *Tetris Attack*. An action game, *Super Mario World 2: Yoshi's Island*, followed and spawned an entire series of games; in them, Mario and his friends are still babies and Yoshi throws eggs to attack enemies and interact with the environment. Eventually, this series became the most representative of Yoshi's games.

WARO

In *Super Mario Land 2: 6 Golden Coins*, Mario's castle was stolen by a guy he'd known since childhood—Wario. The sequel, *Wario Land: Super Mario Land 3*, was released in 1994; at that point, Wario took his place as the lead character of the series. After that, it came to be called the *Wario Land* series. In these games, Wario chases after money and adventure. In 2003's *WarioWare, Inc.: Mega Microgame\$!* for Game Boy Advance, Wario made himself the president of his own company, WarioWare, Inc. As a result, *WarioWare* became a series of games featuring all kinds of plots where Wario tries to get his hands on more and more money.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

Will Princess Toadstool be kidnapped again? Is there no end to the constant feuding between Mario and Bowser?

"Mario, please come to the castle. I've baked a cake for you. Yours truly, Princess Toadstool."

"Wow, an invitation from Peach! I'll head out right away. I hope she can wait for me!"

Mario is so excited to receive the invitation from the Princess, who lives in the Mushroom Castle, that he quickly dresses in his best and leaves right away.

"Hmmm, something's not quite right here . . . It's so quiet . . ."

Shaking off his uneasy premonition, Mario steps into the silent castle, where he is greeted by the gruff words, "No one's home! Now scram! Bwa, ha, ha."

The sound seems to come from everywhere.

"Who's there?! I've heard that voice somewhere before . . ."

Mario begins searching all over the castle. Most of the doors are locked, but finding one open, he peeks inside. Hanging on the wall is the largest painting he has ever seen, and from behind the painting comes the strangest sound that he has ever heard . . .

"I think I hear someone calling. What secrets does this painting hold?"

Without a second thought, Mario jumps at the painting. As he is drawn into it, another world opens before his very eyes.

And so begins the grandest of all adventures!

Once inside the painting, Mario finds himself in the midst of battling Bob-ombs. According to the Bob-omb Buddies, someone . . . or something . . . has suddenly attacked the castle and stolen the "Power Stars." These stars protect the castle; with the stars in his control, the beast plans to take over the Mushroom Castle.

To help him accomplish this, he plans to convert the residents of the painting world into monsters as well. If nothing is done, all those monsters will soon begin to overflow from inside the painting.

"A plan this maniacal, this cunning . . . this must be the work of Bowser!"

Princess Toadstool and Toad are missing, too. Bowser must have taken them and sealed them inside the painting. Unless Mario recovers the Power Stars immediately, the inhabitants of this world will become Bowser's army.

"Well, Bowser's not going to get away with it, not as long as I'm around!"

Stolen Power Stars are hidden throughout the painting world. Use your wisdom and strength to recover the Power Stars and restore peace to the Mushroom Castle.

"Mario! You are the only one we can count on."

FEATURES

MARIO IN THE THIRD DIMENSION

Super Mario 64 is the first 3D action game in the series, and was a launch title for the Nintendo 64 console. The analog Control Stick opened up new options for Mario's movements. This game also greatly expanded the types of actions in Mario's repertoire, with new maneuvers like the triple jump and wall kick. Another milestone: this is the very first game to include Mario's voice!

POWER STARS IN THE PICTURES!

Join Mario on an adventure to collect the Power Stars and rescue Peach. Search for the Power Stars hidden within each course through different types of challenges: defeat enemies, solve puzzles, and find hidden mechanisms. There are a lot of Power Stars to find: 120 in all!

MARIO RUMBLES

About a year after the game's initial release, a Rumble Pak compatible version of the game was released in Japan. This new version didn't just make the controller vibrate: it also added new dialogue for both Mario and Peach and changed other details including the sound effects and image for Jolly Roger Bay.

AND MORE

MEMORABLE MOMENTS

Do you remember these iconic scenes? There's so much Mario can do in this game, so here are just a few highlights.

MARIO'S FACE

Mario's head appears on the title screen, and you can stretch it! This was designed to help players become familiar with the Nintendo 64 controller.

If you leave Mario alone for about thirty seconds, he sits down and dozes off, but he doesn't sleep on courses with cold weather. If you wait even longer, Mario lays down, fast asleep.

RAGE OF THE MOTHER PENGUIN

On Cool, Cool Mountain, if Mario brings the Li'l Penguin back to her mother, and then tries to take her away again, the mother will get angry and chase after him.

THE PENGUIN COPIES YOU!

If you do a slide attack near the Li'l Penguin, it tries to do the same thing.

Normally when Mario falls from a great height, he takes some damage. But when he falls into sand or snow, he doesn't take damage. If he falls during a slide attack, his head gets buried and his legs stick out.

CATCH MIPS

There's a yellow rabbit in the basement of Mushroom Castle. It runs away as you get close, but if you chase and catch it, you'll get a Power Star. The rabbit is named MIPS, after the Nintendo 64's microprocessor ("Microprocessor without Intertocked Pipeline Stages").

Mario's cap can be stolen by Klepto the Condor in Shifting Sand Land, blown off by the wind on Snowman's Mountain, and stolen by Ukkiki on Tall, Tall Mountain. Mario takes more damage when he is hit bareheaded, so make sure to find his stolen hat before you leave the course.

In the "Bowser in the Sky" course, just before Mario passes through the final pipe to take on Bowser, an illustration on a pillar shows a previous battle between the famous foes.

YOSHI ON THE ROOF!

After you've collected all 120 Power Stars, Yoshi appears on the roof of Mushroom Castle. The cannon on the beach will send Mario up to meet his friend, who delivers a message from the Nintendo staff and a gift of one hundred extra lives.

HELPFUL HINTS & TECHNIQUES

These tips might help you on your quest to find all 120 Power Stars and to discover the secrets of Mushroom Castle!

ALL 120 POWER STARS

After you collect all 120 Power Stars, Mario can meet up with Yoshi. But that's not the only thing that changes. The Big Penguin on Cool, Cool Mountain gets bigger, and if Mario challenges Bowser to a rematch, he has something new to say.

DOUBLE POWER-UP

In the Dire, Dire Docks, a green block and a blue block are very close together. If you use them both, it's possible to become Vanish Metal Mario.

THE GLITTERING TRIPLE JUMP

After Mario has talked with Yoshi and the life counter hits 100, you might notice something different about the triple jump. Now it sparkles, and Mario doesn't take damage from a big fall.

1-UP MUSHROOM

If you see a group of three butterflies, try to catch one. It might transform into a 1-Up Mushroom . . . or a bomb.

1,000 COINS

In the original Japanese release, if you collect more than 1,000 coins in the "Bowser in the Dark World" course, an M appears in your life counter. This means that the counter has flipped! Now, grabbing a 1-Up Mushroom will decrease the number of lives that you have, and if you lose a life the counter increases.

HAT IN HAND

In Snowman's Land, if Mario teleports after losing his cap, an extra cap appears on the ground. When he picks up the cloned cap, you see a rare sight: Mario walking with the cap in his hand.

CREDITS CAMERA

While the credits are scrolling, the Control Stick on a controller plugged into the 2P port can move the camera. See if you can find Mario hiding in the background!

SPORTS GAME HISTORY

GOLF

The sports game that Mario has played the most is golf. The first game he starred in was the 1987 game *Family Computer Golf: Japan Course* for the Famicom Disk System. They even had an event where players could send their high scores through a data communications device, a "Disk Fax" in stores, so they could compare scores from all over Japan. This progressed to 2014's *Mario Golf: World Tour* for Nintendo 3DS where huge tournaments could be held over the internet. Mario's game has evolved with a move from a bird's-eye view to the 3D screen and the use of items for his shots. The new games have also incorporated the meter that helps the player determine the power and impact of a golf shot, tracing an unbroken line from Mario's original game.

BASEBALL

In the long history of Mario, there have been only two Mario baseball games, but between the two, more than fifty characters have appeared. Sure, you have Mario and Bowser, but Toadsworth, Pianta, Monty Mole, Dry Bones, and many others have stepped up to the plate. You can choose your team from your favorite *Super Mario* family characters. Each character has different strengths and weaknesses, and if you don't choose the batting lineup and positions carefully, you're not going to play a very effective game of baseball!

TENNIS

The first time Mario appeared in a tennis game was in the NES game, *Tennis*, but only as the referee. Then in 1995, *Mario's Tennis* came out for the Virtual Boy, which was the first time Mario appeared as a player. He had changed his overalls for tennis gear and played with other members of the *Super Mario*

family. In the year 2000, *Mario Tennis* debuted for the Nintendo 64 game system. Not only did it feature characters like Daisy and Birdo, but it also included the very first appearance of Waluigi. It included a total of sixteen different characters of the *Super Mario* family, the most of any game up to that time. *Mario Tennis Open* was released for the Nintendo 3DS in 2012 and featured the star character, Luma.

SOCCER

In 2005, Mario made his first venture into the world of soccer with *Super Mario Strikers* for Nintendo GameCube. Because of its rough play, it got a reputation as being a "fighting" soccer game. Mario abandoned his overalls and instead donned a uniform, and with his Super Strike—among other eye-catching attacks—he really threw himself into the game of no-holds-barred soccer. He also appeared in *Mario & Sonic at the London 2012 Olympic Games*, which was more of a standard soccer game.

BASKETBALL AND OTHER SPORTS

In *Mario Hoops 3-on-3*, a 2006 release for Nintendo DS, Mario decided to try his hand at basketball. The player could choose from twenty-one characters, some even coming from the *Final Fantasy* series, to join your team to play 3-on-3 rules for basketball. In 2005, the Nintendo GameCube version of *NBA Street V3* included some *Super Mario* family characters to play games of street basketball alongside of NBA players. Mario also upped his basketball game in *Mario Sports Mix*. This game featured Mario playing volleyball, hockey, and dodgeball all on the same disc.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

Close your eyes and imagine . . . soothing sunshine accompanied by the sound of waves gently breaking on the shore. High above, seagulls turn lazy circles in a clear blue sky. This is the Isle Delfino.

Far from the hustle and bustle of the Mushroom Kingdom, this island resort glitters like a gem in the waters of a southern sea.

Mario, Peach, and an entourage of Toads have come to Isle Delfino to relax and unwind. At least, that's their plan . . . but when they arrive, they find things have gone horribly wrong . . . According to the island inhabitants, the person responsible for this mess has a round nose, a thick mustache, and a cap . . .

What? But . . . that sounds like Mario!?

The islanders are saying that Mario's mess has polluted the island and caused their energy source, the Shine Sprites, to vanish.

Now the falsely accused Mario has promised to clean up the island, but . . . how?

Never fear! FLUDD, the latest invention from Gadd Science, Inc., can help Mario tidy up the island, take on baddies, and lend a nozzle in all kinds of sticky situations.

Can Mario clean the island, capture the villain, and clear his good name? It's time for another Mario adventure to get started!

FEATURES

WRONGFULLY ACCUSED!

With beautiful blue skies, the resort Isle Delfino is the stage for an ever-expanding 3D action game. Even though they came for vacation, the Mushroom Kingdom crew get caught up in a crime. As Mario tries to find the true culprit, he also must gather up items called Shrine Sprites. The key to the mystery comes in the form of someone (or something) that looks just like Mario. The dramatic story unfolds with a lot of movie-grade cut-scenes, now with the visual power boost of the Nintendo GameCube console!

MARIO'S CREW

Your partner in this adventure is the water pump Mario straps to his back. FLUDD sprays water, propelling Mario around the world and cleaning up the thick goop polluting the island. Barring a brief appearance in *Super Mario 64*, Yoshi appears for his first 3D adventure.

CHARACTERS

PLAYER CHARACTER

Mario gets caught up in a criminal case while he's trying to take a vacation. He and the water pump FLUDD go on an adventure together!

MARIO

Mario carries FLUDD on his back throughout his adventure to clean up the polluted island.

FLUDD

The mad scientist E. Gadd created this all-purpose pump, FLUDD. You can do all kinds of things with its water spouts.

FLUDD POWERUPS

FLUDD shoots water forward with the normal nozzle, but there are three other types of nozzles that can be switched out, too. You can attach a secondary nozzle in addition to the squirt nozzle; it can be switched out with a nozzle box.

SQUIRT NOZZLE

This nozzle fires forward. It can clean up pollution and also attack enemies. This nozzle is always installed on FLUDD.

HOVER NOZZLE

With this downward-pointing nozzle, not only can you clean up pollution below you, but you can also float in the air on a jet of water for a short while.

ROCKET NOZZLE

This nozzle blasts water downward, sending Mario straight up high in the sky. It takes some time to charge before it can blast off.

TURBO NOZZLE

It blasts water behind Mario with great force, allowing him to dash at extremely high speed. It's possible to use this to dash over the surface of the sea.

YOSHI

Yoshi hatches out of an egg. He can eat enemies by capturing them with his long tongue. He can also spit out juice, which has similar effects as FLUDD. Depending on the fruit he eats, he'll change into three different colors, and certain enemies react differently depending on his color and the type of juice he spits. If too much time passes or he spits out too much juice, his stomach meter can run to empty. In that state, he may vanish if he falls into the water.

-  ORANGE YOSHI
-  BLUE YOSHI
-  PURPLE YOSHI

ENEMIES

Mario may meet these enemy characters during a course. You'll cross paths with familiar enemies like Boos and Bloopers, but some characters look and act a little differently in this game.

<p>BEE</p> <p>Bees are never found far from their hives. If Mario brings down the hive with a spray of water, they swarm him.</p> 	<p>BLOOPER</p> <p>They creep along the ground. If Mario gets close, they try to spray him with ink.</p> 	<p>BOB-OMB</p> <p>They march around, and after a while, explode. They will stop moving if Mario sprays water on them.</p> 	<p>BOO</p> <p>These ghostly foes drift through the air and get in Mario's way. Some types turn into coins and others are see-through.</p> 	<p>BOO (PINK)</p> <p>If Mario sprays water on these pink Boos, they transform into platforms for a short time.</p> 
<p>BOWSER</p> <p>The final boss. He breathes powerful gusts of fire at Mario from the middle of his hot tub.</p> 	<p>BOWSER JR.</p> <p>The culprit behind Shadow Mario's vandalism! During the final battle, he shoots Ganet Bills from a small boat.</p> 		<p>BULLET BILL</p> <p>Fired from Bill Blasters, these enemies fly straight in Mario's direction.</p> 	
<p>BULLET BILL (BLUE)</p> <p>These enemies can be used to fill up FLUDD's water tank if defeated. They also produce 1 Up Mushrooms.</p> 	<p>BULLET BILL (GOLD)</p> <p>These Bullet Bills only make rare appearances. If they are defeated, Mario earns eight coins.</p> 	<p>BULLET BILL (PURPLE)</p> <p>Once fired from Bill Blasters, these homing missiles chase Mario wherever he goes.</p> 	<p>CATAQUACK (BLUE)</p> <p>When Mario comes close, they try to hurt him high into the air. They do not damage Mario.</p> 	<p>CATAQUACK (RED)</p> <p>These Cataquacks try to toss Mario into the air, but do damage in the process.</p> 
<p>CHAIN CHOMP</p> <p>Once cool to the touch, Mario can pry up their stakes and haul these fiery-bodied foes around by the chain.</p> 	<p>CHAIN CHOMPLET</p> <p>These mini Chain Chomps are scaring-hot, but Mario can cool them off and redirect them by pulling their chains.</p> 	<p>CHEEP CHEEP</p> <p>These fish usually just swim through the water, but one type jumps out. Mario can't defeat them.</p> 	<p>COO COO</p> <p>These birds fly through the sky dropping goop. If Mario hits them with water, they leave coins behind.</p> 	<p>EELY-MOUTH</p> <p>This giant eel lives at the bottom of Noki Bay. His oral typhoons is terrible. Cleaning his teeth is a dangerous job!</p> 
<p>ELECTRO-KOOPA (BLUE)</p> <p>These Koopa have electrified shells. If Mario is nearby, they'll throw their shells in an attempt to electrocute him.</p> 	<p>ELECTRO-KOOPA (GREEN)</p> <p>This troublesome turtle causes Pinna Park's Ferris Wheel to break down. It sleeps above a metal grate.</p> 	<p>ELECTRO-KOOPA (RED)</p> <p>They pace along fences. Mario can defeat them by kicking them from the other side of the fence.</p> 	<p>GLORPEDO</p> <p>They roll down hills, leaving trails of pollution as they go. If Mario hits them with water, they collapse into mud-like puddles.</p> 	<p>GOOBLE</p> <p>They emerge from puddles of goop and try to attack Mario. They come in a variety of colors.</p> 
<p>GOOPER BLOOPER</p> <p>This squid attacks by whipping its tentacles around. Mario can defeat it by pulling its lips back and snapping them.</p> 	<p>JUMPING BLOOPER</p> <p>They come from the sea. Mario can stand on them by dosing them with water, which makes them float on the surface.</p> 	<p>KING BOO</p> <p>He spins the slot machine, and depending on the results, enemies or rewards pop out. He hates hot peppers.</p> 	<p>KLAMBER</p> <p>They move along walls and fences. Mario can defeat them if he attacks from the other side of the fence.</p> 	<p>LAVA CHEEP CHEEP</p> <p>These fire-covered Cheep Cheeps swim through lava. AND MORE

MEMORABLE MOMENTS

These scenes really made an impression. There are a lot of iconic moments featuring Shadow Mario... but who was he, really?

THE DOLPHIN ISLAND

Isle Delfino, the setting for this adventure, is in the shape of a jumping dolphin. Its name means dolphin as well. Sometimes you can see over hills or across the

water to other areas of the island. You can see Ricco Harbor from the Bianco Hills, and you can see Sirena Beach from Pinna Park.

A STRANGE OLD MAN

FLUDD comes from Gadd Science, Incorporated. Its inventor, E. Gadd, is the same guy who made Luigi's weapons in the Nintendo GameCube game

Luigi's Mansion. Bowser Jr. also mentions that he got his equipment from a strange old man in a white coat, so it's possible that his magic paintbrush came from the same company.

MARIO'S PROFILE

When you register as the user of FLUDD, an interesting profile of Mario comes up on screen. When you look closely at the Japanese text, it has some

interesting info on Mario. You'll see, "Favorite food: spaghetti, least favorite food: poison mushrooms, weight: it's a secret, height: unknown, number of previous jobs: unknown," and more.

PEACH IN A PONYTAIL!

Both Mario and Princess Peach have dressed to match the tropical climate of this game. Peach wears a sleeveless dress and her hair is tied up in a ponytail. After this game, she appears with a ponytail for sports games such as *Mario Kart* and *Mario Tennis*.

BOWSER JR.'S GRAFFITI!

Throughout the game, Bowser Jr. does a lot of vandalizing—and creates a lot of enemies in the process! As a result, their design is slightly different than

in other games in the series. Yoshi also vanishes when he falls into the water for the same reason.

SECRET COURSES

There are secret courses hidden in some areas. As you enter, Shadow Mario steals FLUDD, so Mario has to find his way to the Shine

Sprite without his watery companion's help. But after Mario has cleared the course, FLUDD reappears on his back so he can take on the next mission with its help.

WORN-OUT VOICE

When Mario has taken enough damage that he's close to losing a life, he's more exhausted and his voice changes to match.

SHADOW MARIO'S IDENTITY REVEALED

At the start of the game, the vandal's identity is a

mystery. But when his identity is finally revealed, it turns out to be Bowser's son, Bowser Jr.! Apparently, Bowser told his son that Marlo was a bully who kidnapped Peach. This game is Bowser Jr.'s first appearance, and the design of his scarf is different than what it became for later games.

SHADOW MARIO IS A THIEF!

Shadow Mario is always running around vandalizing Plaza Delfino. He will grab your Yoshi eggs or FLUDD power-ups, but you can stop him and get them back by spraying enough water on him.

MARIO CAN RIDE YOSHI!

This is the first time in a 3D action game where Mario can actually ride Yoshi. Using fruit juice and his long tongue as weapons, he joins Mario for the adventure.

FAMILIAR SHAPES

If you look at Sirena Beach from the right angle, you can make out the shape of a Nintendo GameCube controller. And take a look at the Hotel Delfino, too—it looks like the console!

MARIO'S HAT SWIPED!

On the beach at Pinna Park, there's a version of Soarin' Stu called Swipin' Stu that attacks Mario and steals his cap. Without it, Mario takes a bit of extra damage. After Stu has taken the hat, his face changes to look more like Mario's.

FLOODED PLAZA DELFINO

If you have completed all the missions that involve capturing Shadow Mario, you return to Plaza Delfino and find it entirely flooded. In the flooded state, you're able to chase Shadow Mario all the way to Corona Mountain and take on the final course.

HELPFUL HINTS & TECHNIQUES

SUNGLASSES AND HAWAIIAN SHIRTS

Once you talk to the Sunglasses Vendor Pianta, he'll loan Mario his sunglasses as long as you've gathered thirty Shine Sprites. Put them on and the screen gets slightly darker. After you clear the game, Mario dons the shades and a Hawaiian shirt. If you talk to the Sunglasses Vendor again, you return to Mario's normal look.

These rare events only occur when you've met certain conditions. This is the only game in the series where you can see Mario in sunglasses!

COLLECT ALL 120 SHINE SPRITES?

There are 120 Shine Sprites to be found in the game. Once you've gathered them all, your save file gets a special mark, and there's a new cutscene after the credits scroll.

FEATURES

RETURN OF THE SIDE-SCROLLER

After *Super Mario Land 2: 6 Golden Coins*, there wasn't another 2D side-scrolling action game starring Mario for fourteen years. In *New Super Mario Bros.*, Mario returns to the original format to battle Goombas and Koopa Troopas across eight worlds in this ever-expanding adventure. The controls are the +Control Pad and two buttons, so of course you can still dash and carry objects. Some actions from the 3D games, such as the ground pound and wall jump, were incorporated as well.

MINIGAMES FOR ALL

In addition to the main story mode where Mario rescues Princess Peach, there are two multiplayer modes available through wireless connection.

COIN TOSS
Dash or throw. Big Stars appear randomly all over the course. Move quickly and grab them before your opponent does.

AND MORE

From Mega Mario grabbing the Goal Pole to the final battle with Bowser, this title had a lot of scenes that became the talk of fans everywhere. This game was also the first appearance of Dry Bowser.

Bowser is the boss of World 1, and Mario battles him on a bridge above a pool of lava—just like the first *Super Mario Bros.* game! Press the Skull Switch behind Bowser and see what happens next!

Mega Mario can just trample over enemies and traps, and he even blows the Goal Pole away. Mario's surprised at that, and tilts his head in confusion. But in the end, you get five 1-Ups and clear the course.

Normally, after you clear World 2, you move on to World 3. But if Mini Mario defeats the boss in World 2, you move on to World 4 instead. Similarly, if Mini Mario beats the World 5 boss, you skip ahead to World 7.

Bowser has fallen into the lava lake, and turned into a skeletal version of himself. From this game onward, Bowser is an even stranger archenemy who always returns to fight Mario again and again. Dry Bowser even appears as a player character in *Mario Kart Wii*, among other games.

Bowser is one of the biggest characters in the game, and your final battle is with him! But Mega Mario can easily crush even Bowser, and he's not affected by the Koopa King's fireballs.

As the credits roll on the lower screen, when you touch the letters, you hear different sounds. And in the upper screen, you see a scene from each of the courses you cleared. If you later clear more courses, they are added to the montage.

LUIGI'S ADVENTURE!

You can play as Luigi in the single-player story mode. While you're on the file select screen, if you press both the L and R Buttons, and hold them while you press the A Button, Mario turns into Luigi and you can play him as the main character. Luigi's abilities are the same as Mario's.

FRESH WALLPAPER!

After you clear World 8, if you go back to World 1, you'll find a blue Toad House. There, you can exchange some of your Star Coins for different wallpapers to adorn your lower screen. There are five possible wallpapers, including the original one from the start of the game.

TITLE SCREEN CAMBO

If you let the title screen run without pressing any buttons, after a little while a prologue video starts. Luigi appears from time to time in the video.

SALUTATIONS FROM MARIO

When you close the Nintendo DS clamshell during the game, you hear Mario's voice say "Bye-bye!" When you open it again, he says, "It's me, Mario!"

HELPFUL HINTS & TECHNIQUES

When you meet certain conditions, you can unlock special parts of the game. But how many people fixate on the time remaining when Mario touches the Goal Pole...?

SHOOT TO NEW WORLDS!

If you find the hidden goals in certain courses, you can open up a hidden route to a warp cannon. Use it to blast yourself from one world to another. There are five possible cannons: Worlds 1 and 2 go to World 5, World 3 goes to World 6, World 4 goes to World 7, and World 5 goes to World 8.

TOAD HOUSES

If at the moment you clear a course the last two digits in the timer are the same, a Toad House will appear. The digits 1, 2, and 3 produce red Toad Houses; 4, 5, and 6 create green Toad Houses; and 7, 8, and 9 make orange Toad Houses. Also, the Super Mario Bros. theme will play and the same number of fireworks explode.

CHALLENGE MODE

After you beat the game, if you press START from the world map, then enter L, R, L, R, X, X, Y, Y in that order, it unlocks a secret Challenge mode. You'll enter a version of the game where the camera won't move backwards. If you catch Mario between the edge of the screen and a wall, you can "walk through walls" like in the first Super Mario Bros. game.

STARS ON YOUR SAVE FILE

The file select screen gives you stars to show how much of the game you've completed. If you clear World 8, you get one star. If you've found every secret exit and opened every path on the world map, you get two stars. If you've found and spent all of the Star Coins, you get three stars.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

Every hundred years, a huge comet flies by in the skies above the Mushroom Kingdom. One year, that comet filled the entire sky, and from it fell a stream of shooting stars. The Toads scooped up the Star Bits and brought them to the castle, where they were reborn as a great Power Star. It was a happy time in the Mushroom Kingdom. Then one night Mario received a letter . . .

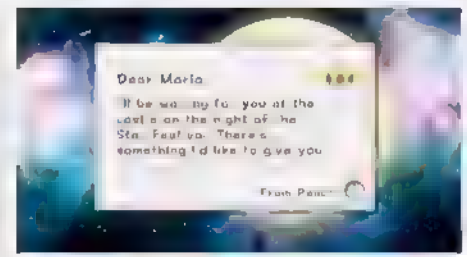

Dear Mario,
I'll be waiting for you at the castle on the night of the Star Festival. There's something I'd like to give you.
From Peach

With invitation in hand, Mario headed off to the castle just as the Star Festival was getting into full swing. Surrounded by Toads gleefully trying to catch falling Star Bits, Mario was looking forward to the night's festivities.

But then, something happened . . .

Every hundred years, a comet appears in the skies above the Mushroom Kingdom.

FEATURES

A SPACE ADVENTURE

Mario shoots into space on an expansive 3D adventure! With help from Rosalina and the Lumas, stationed in the Comet Observatory, Mario ventures through the universe searching for Power Stars.

One of the key new actions is the spin, triggered by shaking the Wii Remote. With a spin you can defeat enemies or flip switches to make your way through a course. This is also the first 3D action game in the series that allows for two players; the second player helps Mario out with the Wii Remote's pointer.

COURSES WITH GRAVITY

Countless planets floating in space await Mario on his adventure. There are spherical planets, places where gravity changes when you cross a line, toylike planets, and planets made of water, among many others . . . Shapes, sizes, and direction of gravity are just some of the things that change as Mario collects Power Stars. The background music offers a lot of variation in its orchestration as well. Mario's majestic adventure through the universe is picking up speed!

CHARACTERS

Luigi's gotten himself separated from the Toad Brigade, and Mario needs to rescue him. After finding him, he'll hang out in the Garage and help Mario find more Power Stars.

TINY TOY TRAIN

There's a small toy train in a hidden alcove in the Toy Time Galaxy. If you go there when you're not Spring Mario, you can find it.

FRANKSTEIN COMET!

After gathering thirteen Power Stars, comets fly in and change all the rules! There are five different types, including Daredevil Comets (which force Mario to fight a boss with only one life) and Speedy Comets (which turn some levels into speed runs).

LUIGI CALLS FOR HELP

Luigi tries to help Mario collect Power Stars, and he takes it upon himself to go on the hardest missions. During Mario's adventure, every now and then a letter arrives begging him to go to the place in the photograph and help Luigi. But even if Luigi needs to be rescued . . . he's already done the hard work of finding the Power Star!

CHALLENGE THE PLANET OF TRIALS

After gathering all three Green Stars, the Comet Observatory's Planet of Trials opens up. There are three types of trials you can attempt: surfing on a Ray, rolling on a Star Ball, and floating in a bubble.

THE TRUE ENDING?!

If Mario's gathered all 120 Power Stars from the main adventure, you see the final cut scene. But after the credits have rolled, there's another scene, too.

EVEN MORE LUIGI!

After you've completed the game by collecting all 120 Power Stars, you can have a new adventure with Luigi. He has slightly different abilities than Mario, and you can collect all 120 Power Stars with him instead of Mario. On the missions where he appears, Luigi encounters his double!

A GRAND FINALE!

If you've collected 120 Power Stars with Luigi, you can experience the Grand Finale! After that, Mario and Luigi have together collected 242 Power Stars and cleared the entire game.

THE TOAD BRIGADE'S PROMOTION!

If Mario talks to Captain Toad after finishing the game, you find that all the efforts of the Toad Brigade have been rewarded, and they've been promoted to the Royal Guard.

A CELEBRATORY LETTER

At the very end of the Grand Finale Galaxy, you receive a letter delivered by a Toad. You have to go into your Wii Message Board to read it, and it comes with a photo attachment (the messages are different for Mario and Luigi).

AND MORE

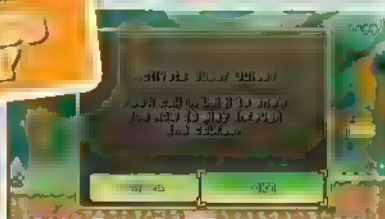

Here a few memorable scenes you're sure to recognize. There are all sorts of things you can do on the World Map too!

RESCUE AND REWARD

When playing solo, there are courses where a trapped Toad appears. Rescue him from the ? Block and carry him all the way to the goal. If it's a little Toad you get a 1-Up, but if it's Super Toad, you get a 3-Up!

If you lose eight lives on one course, a Super Guide Block appears. Hit it, and Luigi comes out to demonstrate how to clear the course. You can either cancel the guided play in the middle or allow it to get you all the way to the end.

HELPFUL TOAD HOUSES

Toad Houses appear on the World Map, and they can really help Mario and his friends on their adventures. They come in three types: Red, Green, and Star. In the Red and Green Toad Houses you play minigames for items or extra lives. You can get Super Stars in the Star Toad House.

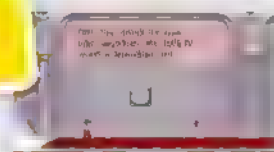

There are enemies wandering around on the World Maps, and if they bump into you, a battle begins. Attack them and avoid their attacks while you grab all the Toad Coins placed on the screen. When you get all the coins, you've cleared the battle. Free the Toad trapped in the treasure chest and he'll give you three Super Mushrooms.

HINT MOVIES AT PEACH'S

If you go to Peach's Castle in W1, you can use the Star Coins you've collected to see hint movies. You can learn some super skills or on how to get infinite 1-Ups, among other things. There are sixty-five different movies in all that can help you on your adventure.

You've defeated Bowser, and now Mario can be reunited with Princess Peach . . . or so you thought! It turns out that Kamek is in that cage dressed up as Princess Peach. He then makes Bowser giant-sized, and leads you to the actual final battle.

THE SPECIAL WORLD

Once you've defeated Bowser and rescued the princess, you can access the special World 9.

There are a total of eight courses on W9, but to play them you have to collect all the Star Coins on each of the courses in W1-W8. Collect all of a world's Star Coins to open its corresponding W9 course gate.

CREDITS COIN BATTLE

Mario, Luigi, and the Toads dance during the credit scroll, but you can still control them. The letters of the credits are on blocks, and if Mario hits them, some will produce coins. At the end you'll see who collected the most coins to get the highest score.

If you have maxed out the number of lives you can have at ninety-nine, Mario takes off his hat (if you fall below ninety-nine, the hat returns). It's only Mario who removes his cap—Luigi won't lose his lid.

HELPFUL HINTS & TECHNIQUES

Here we'll impart some tidbits that may help you on your adventure. When you've got all five stars on your save file, you've cleared the entire game.

THE HIDDEN GOAL SHORTCUT

Some of the courses have a hidden Goal Pole with a red flag (hidden goals). Most of these goals allow you to travel along a different route with a shortcut to the castle, but some of them lead to huge cannons. The cannons will warp you to different worlds. W1 and W2 lead to W5. W3 and W4 lead to W6. W5 and W6 lead to W8.

GET MORE STARS THE MORE YOU PLAY

You get stars marked on your save files depending on how much of the game you've completed. If you clear the game all the way through Bowser's Castle in W8, you get one star. If you can clear all the courses from W1 through W8 (without using Super Guide), you get two stars. Get all the Star Coins from W1 through W8, and you get three stars. Get all the Star Coins from W9, and you get four stars. If you've cleared all of the previous conditions plus opened the way to all the cannons (without using Super Guide), then you get five stars. If you've done it all without ever causing the outlined blocks to appear, all your stars will twinkle!

MAKING THE FIREWORKS HAPPEN IN MULTIPLAYER

When you play with two or more people and get to the Goal Pole when the last two digits of the time remaining are the same, you'll cause the fireworks to go off. It also makes a Toad House appear on the first circle of the world on the World Map. The time you grab the pole will determine the type of Toad House. 11 and 22 will get you a Green Toad House. 33, 44, 55, 66, 77, and 88 will get you a Red Toad House. And 99 will get you a Star Toad House.

INTRODUCTION

STORY

*This text is taken directly from the instruction booklet.

Shining stardust falls on the Mushroom Kingdom once every hundred years. That time had come again . . .

Dear Mario,
 Would you like to share some cake while we watch the shooting stars?
 Meet me at the castle!
 Peach

Mario ran through the field with stars falling around him. Suddenly, he noticed a strange light in the grass.

As he peered cautiously through the reeds, he saw a small, lost Luma.

With the baby Luma tucked safely under his cap, Mario rushed on to the castle.

But when he got there, something unexpected was waiting for him . . .

FEATURES

AN ADVENTURE IN A NEW GALAXY!

They call this sequel to *Super Mario Galaxy* "another story of stardust." The basic controls are the same, but new power-ups have been added! Yoshi also joins the adventure to search for Power Stars. This time, our heroes are flying on a starship shaped like Mario's head through a brand-new world map. Some galaxies have missions where you try for a high score, and others where you grab on to a Fluzzard and glide through the world. Many different and wonderful planets await you!

All you need is one more Wii Remote and a friend to bring in the Co-Star Luma for two to play the game together. The Co-Star Luma can defeat enemies, grab far-off items, and help Mario in his adventure.

MEMORABLE MOMENTS

THE STARSHIP MARIO LAUNCHES!

When Mario gets sent into space, he lands on a small planetoid spaceship that seems to be falling apart. With the help of Lubba and a Power Star, it gets a makeover into the *Starship Mario*, a spacecraft that looks just like Mario's head! Mario takes the wheel and heads into the universe. As the adventure continues, *Starship Mario* takes on new crew and passengers.

Here we present some familiar scenes that are a bit different from the previous game.

YOSHI'S HOUSE

The first adventure, *Sky Station Galaxy*, begins with a house that looks like Yoshi's home. A signboard says, "Hello! I'm out helping some friends right now. Sorry if I missed you!" This is a reference to *Super Mario World*. As it turns out, Yoshi is captured in the galaxy next door, the Yoshi Star Galaxy.

TRADE PLACES!

You meet Luigi again during your adventures in World 3. After that, whenever you see Luigi on a course and decide to talk to him, Mario can trade places with Luigi and you can play that course as Luigi. Luigi appears in some other scenarios as well.

GHOST LUIGI

If you clear a mission with Luigi, a ghost Luigi appears. Touch him, and he'll tell you about hidden items or some super play (a run that features amazing speed or skill). If you collect 9,999 coins or more, then you don't even need to clear the mission. Ghost Luigi will already be there.

THE PRANKSTER COMET

While Mario is adventuring in World 3, the Prankster Comet comes along to add a brand-new mission to a galaxy that's already cleared. The Prankster Comet comes more often when you've gathered up more Comet Medals.

COSTUME CHANGE!

The Banktoad on the *Starship Mario* goes through six different costume changes, depending on how many Star Bits you entrust to him.

LOQUACIOUS LUBBA

As Lubba is on the *Starship Mario*, his dialog with Mario changes depending on the amount of time you've played and the number of Star Bits you've collected.

SPOOKY SHADOWS

In the very first Shiverburn Galaxy, on the tains in the background, humanoid figures seem to be staring back at you.

CHEERLEADING GO-STAR

When a second player is playing the Co-Star Luma, the buttons on that player's Wii Remote can give off a range of different sounds.

PLAY DURING THE CREDITS!

Mario can still move around freely during the credit scroll section too. He isn't wearing his cap then. If you win, having collected 120 Power Stars, there's a Bee Mushroom there for you.

THE FURTHER ADVENTURES OF LUIGI

Once Mario has defeated Bowser at the end of World 6, Mario's Changing Room opens up the Starship. There, you can switch your player character to Luigi. If you're playing the game as Luigi, the title screen changes from Mario to Luigi.

BLAST FROM THE PAST

In the Throwback Galaxy in World 8, the "throwback" is a course made as an homage to Whomp's Fortress from *Super Mario 64*. The boss, King Whomp, is waiting at the end. Also, Twisty Trials Galaxy has a motif of the secret course found in Rico Harbor from *Super Mario Sunshine*. You'll also see an homage to *Super Mario Galaxy* featured in Mario Squared Galaxy and Stone Cyclone Galaxy.

THE GREEN STAR CHALLENGE!

After you've collected 120 stars and are heading toward the ending, a Green Prankster Comet passes through all the galaxies. Now you must find the Green Stars skillfully hidden within each course. Some event scenes turn their letterbox stripes green.

THE FINAL GALAXY

After you've collected all 120 Green Stars, the final galaxy in World 8, Grandmaster Galaxy, appears.

THE ULTIMATE CHALLENGE!

After you've cleared the first mission in Grandmaster Galaxy (the Ultimate Test), you must collect all the Comet Medals. Plus, you must entrust Bankload

with 9,999 Star Bits before the second mission in the galaxy, the Perfect Run, appears. This is the hardest mission in the game—it's the same mission as The Ultimate Test, but now with only one hit point. The mission uses music from *Super Mario Galaxy*.

YOU'VE GOT MAIL!

Once you've cleared the second mission of the Grandmaster Galaxy (the Perfect Run), Rosalina is waiting for Mario on the final planet to express her thanks. If you have collected all 242 Power Stars in the game, Rosalina comes to visit him on *Starship Mario*.

A VISIT FROM ROSALINA

When you clear World 6 and head toward the ending, a message appears on your Wii Message Board. When you've collected all the Power Stars, you'll receive another message. Both have pictures attached and include the time you took to clear the missions.

HELPFUL HINTS & TECHNIQUES

9,999 STAR BITS

If you collect 9,999 Star Bits, all the coconuts in the game turn into watermelons (just like the previous game). They look different but work the same way. If you've collected all those Star Bits

but still haven't defeated Bowser in World 6, you will always see Luigi wanting to take over the mission.

If you clear certain special conditions, the following can also happen! Here are some suggestions to help you clear the entire game.

THE CHANGING CROWN

As you complete portions of the game, the crown on your save file changes. If you've collected 120 Power Stars, it is a silver crown. With 240 Stars, it becomes gold. And with 242 Stars, it becomes platinum.

SERIES REMAKES

COLUMN

SUPER MARIO ALL-STARS

SNES | AUGUST 1, 1993

This single SNES cartridge came packed with four remakes! The titles included *Super Mario Bros.*, *Super Mario Bros. 2*, *Super Mario Bros. 3*, and *Super Mario Bros.: The Lost Levels*. They featured prettier graphics, engaging background music, and a save-game function. The Japanese version of the game (called the *Super Mario Collection*) made a series of minor changes. For example, if you took damage as Fire Mario or Raccoon Mario, you reverted to Super Mario. These changes had already been made to the previous North American *Super Mario Bros. 3* release, and so were maintained for *Super Mario All-Stars*.

SUPER MARIO BROS. DELUXE

GAME BOY COLOR | MAY 1, 1999

This was a remake of the original *Super Mario Bros.* In Japan, this was only available for the Nintendo Power system—which was basically a flash memory cartridge—called a GB Memory Cartridge, onto which low-priced games could be downloaded. For the first time, a fan could enjoy the adventures of Mario in brilliant color on a handheld system. Aside from being able to play in original mode, other new modes were added. In Challenge Mode, a player had to race to the end while finding hidden items. In VS Mode, players raced each other using the Game Boy Color Link cable. As a bonus for fulfilling certain conditions, players were able to unlock *Super Mario Bros.: The Lost Levels* (up to WB-4).

SUPER MARIO ADVANCE

GAME BOY ADVANCE | JUNE 11, 2001

This went on sale the same time as the release of the Game Boy Advance and featured a remake of *Super Mario Bros. 2*. The graphics were similar to those used in *Super Mario All-Stars*. Mario and other characters could now talk. Other new features included the ability to attain a higher score, new enemies, and easier play with a possible five lives. Plus, five "Ace Coins" were hidden in each course.

SUPER MARIO WORLD: SUPER MARIO ADVANCE 2

GAME BOY ADVANCE | FEBRUARY 11, 2002

This was a remake of *Super Mario World*. Things worked quite differently if you played as Luigi instead of Mario. Luigi could jump higher, the fireballs he shot bounced differently, and he could fly higher with the cape than Mario. When he hit a 10-Coin Block, all the coins came out at once. It was easier now to meet up with different-colored Yoshis. When Luigi rode Yoshi and Yoshi ate enemies, he held the enemies in his mouth for attack, only swallowing them eventually.

SUPER MARIO ADVANCE 4: SUPER MARIO BROS. 3

GAME BOY ADVANCE | OCTOBER 21, 2003

This was a remake of *Super Mario Bros. 3*. Although some course layout elements were changed due to the screen configuration, it followed the *Super Mario All-Stars* model. If you used it in conjunction with the e-Reader (sold separately), it opened up many more game possibilities. Vegetables would appear on the course, you could become Cape Mario and fly, and enemies became stronger, among a whole host of other fun additions. If you had e-Reader cards, you could also play new original courses. The e-Reader came with two cards, including Series 2, there were 100 different types of e-Reader cards.

SUPER MARIO 64 DS

NINTENDO DS | NOVEMBER 21, 2004

This remake of *Super Mario 64* went on sale the same time as the release of the Nintendo DS. Yoshi, Luigi, and Wario could take part in the adventure as player characters. Possible actions and power-ups differed depending on the character as they all worked together to rescue Princess Peach. New courses and missions were added, as well as a boost to the number of Power Stars, totaling 150 in this game. There was also a VS mode filled with minigames where the four try to steal each other's Power Stars, as well as a host of minigames utilizing the stylus and Touch Screen.

INTRODUCTION

STORY

A great storm has blown through the Mushroom Kingdom, blowing Super Leaves all over the place!

In the chaos, the princess was kidnapped, and monsters throughout the land have taken on the powers of the Super Leaf for themselves.

Looks like another job for Mario to power up, power through, and save the day.

Here you'll meet some of the familiar and not-so-familiar new faces in this adventure.

FEATURES

A NEW SYSTEM FOR 3D MARIO

This was the first Mario 3D action game for Nintendo 3DS. This return to the action-platform genre managed to reinvent the wheel by borrowing heavily from the concepts in the 2D action games (such as traversing a course to reach the Goal Pole), but it also simplified play. Even those who had a hard time playing

previous 3D games could enjoy it. With the Nintendo 3DS system, the player was able to see a new level of depth within their adventures, even on a small screen.

CHARACTERS WITH TAILS!

This game and its story feature a lot of familiar characters, but this time with tails. This is, of course, the revival of the Super Leaf power-up, where Tanooki Mario can attack with his tail and float slowly to the ground, but it also sees the appearance of many enemy characters with tails. Tail Goomba, Tail Bullet Bill, Tail Boo, Tail Bowser—all familiar characters with tails and with new ways to attack Mario. Even the game logo has a tail!

ADVANTAGES WITH STREETPASS!

Using the StreetPass functionality of your Nintendo 3DS, when you pass someone who also has a Nintendo 3DS and the software, you can get Star Medals, power-ups, and other things that can help you on your adventure! And after you clear some conditions, you may even be able to swap course clear times.

AND MORE

MEMORABLE MOMENTS

Here we look back on some memorable moments, as well as hidden scenes you'll only see if you fulfill certain conditions.

THREE-DIMENSIONAL TITLE SCREEN

If you let the title screen run for a while, you'll be able to play in some rooms where the blocks make odd patterns. And when you see them in 3D...

PHOTOS FROM PEACH

When you clear a world, Mario's sent photos with Peach's present situation. They're bittersweet, making him swing between joy and worry. All of the pictures you've collected are in an album at the Toad House in World 3.

SHAKE IT!

When you shake the Nintendo 3DS system, the pictures you can see in your album move. And when you continuously shake the photo you received for clearing World 3, things appear—like a Goomba and Luigi.

FAMILIAR PIPES

There's a secret room inside a pipe where the coins are all lined up. That is a 3D version of a similar bonus area found in the original Super Mario Bros. game.

IS THAT AUFO?!

When you look through the binoculars on W1-3, you may be able to see a UFO fly by.

A GHOSTLY SURPRISE

Near the Goal Pole in W4-4, if you wait there a while, you see a spooky white shadow hovering around behind the fence.

COURSE CLEARING CELEBRATION

If the final number on the timer is a one, three, or six when you touch the Goal Pole, you may get a result like the photo above.

THE FLIGHT OF THE TANOOKI

During the credits, you can play as a flying Tanooki Mario using the Circle Pad or the +Control Pad. If you happen to be using Luigi at the end, the credits are slightly different than if you're using Mario.

SWEET MOVES, MARIO!

After you clear W8-2, Mario starts showing off the title screen's scene changes. He gets faster and his moves get showier.

LEVEL UP

After defeating Bowser in World 8, a pipe appears in World 1. If you enter it, you're led to a special world! A whole set of them! Forty-eight more difficult courses await you!

TIME ATTACK!

In the Special World, you'll find that all the courses you've cleared now list the time you completed them in. You'll also see other players' times, and you can compete for the best time.

TWIN IN TROUBLE

Luigi has been kidnapped and is held in the castle of S1. Once Mario's defeated the Dry Bowser there, Luigi is unlocked as a playable character.

LUIGI JOINS THE PARTY

Now that Luigi is rescued, you can use him to go through the World Warp Pipe into the W worlds, and when you clear them with Luigi, you can see Luigi going through the same event screens that Mario went through. And if there's a course or two you haven't cleared yet, you can transform into White Kitsune Luigi to help finish it.

FINAL BATTLE

Once Mario's won the final battle with Dry Bowser in the Special Worlds, he'll have a rematch with Bowser. In this final battle, Bowser's movements are faster, and his attacks have been powered up. After defeating that Bowser, you get to see the true ending.

THE CROWN COURSE

After you've gotten five stars on the file select screen, a crown mark appears in world S8. This isn't a course that you can just breeze through. It's the very final course with the toughest level of difficulty of any of them. When the Crown Course appears, the background music for S8 changes.

COSTUME CHANGE

If you get a Triple Crown (obtaining 1,110 lives), Super Mario loses his hat, and Small Mario gains one. When you earn the Triple Crown, you get a fan letter in the mail.

HELPFUL HINTS & TECHNIQUES

Read on for some helpful tips and tricks, including how to decorate your save file with all five stars!

THE ★★★★★ MARK IS PROOF!

Stars appear at the top of your save file depending on how much of the game you've cleared so far. When you clear W8-1, you get ★. When you've cleared all the courses in W1-W8, you get ★★. When you've seen the true ending, you get ★★★. When you've seen the true ending and gotten all the Star Medals from both the regular worlds and Special Worlds, you get ★★★★. If you've done all of the above and gotten a perfect clear on every course (cleared by both Mario and Luigi, and having grabbed each Goal Pole at the very top), you get ★★★★★. Avoid losing more than five lives in a single level, and those stars will really shine!

MULTIPLE JUMPS EARN 1-UPS!

This is the same technique as when you defeat enemies to get a 1-Up. In this game, if you jump on a Chain Chomp, on the tail of a Tail Thwomp, or any other undefeatable enemies, jumping on them five times gets you a 1-Up.

ENTERING THE WARP ZONE!

In W1-2 and W4-2, if you go above the ceiling near the goal post you can find a room with a pipe that will take you to the next world. These are the same courses and approximate locations where you can find the Warp Zones in the original Super Mario Bros. game.

A COMPARISON...

THE 25TH ANNIVERSARY (2010)

For the 25th anniversary of the series, eleven games up to and including *Super Mario Galaxy 2* were included as a part of the campaign.

A huge number of products were made available as part of the Super Mario 25th Anniversary—all sporting the red-colored motif. There were red Nintendo DSi XL and Wii game consoles that featured pre-installed or bundled games like *Mario Kart DS* and *New Super Mario Bros. Wii* in America and *Super Mario Bros. 25th Anniversary Version* in Japan. *Super Mario All-Stars Special Pack* (known as *Super Mario All-Stars Limited Edition* in North America), a part of the original SNES collection, was also released for the Wii.

The official Nintendo website posted special videos including *Super Plays* and the "Mario Drawing Song," and held a Flipnote Studio contest.

THE 20TH ANNIVERSARY (2005)

The anniversary slogan was "Happy! Mario 20th." In Japan, a mini version of the Game Boy Advance, called the Game Boy Micro, went on sale on September 13th, 2005, the same date the original *Super Mario Bros.* was released back in 1985. The look was based on a Famicom controller, and it came complete with the 20th anniversary logo for *Super Mario Bros.*

On February 14, 2004, the Famicom Mini Series version of *Super Mario Bros.* went on sale in Japan. The package came in a special version with the 20th anniversary logo and characters drawn on it. *Dr. Mario & Puzzle League* and *Mario Tennis: Power Tour* were also released. The Japanese versions featured the 20th anniversary logo.

THE 30TH ANNIVERSARY (2015)

The 30th anniversary celebrated seventeen games and featured yellow as its thematic color. The latest in that series, *Super Mario Maker* (see page 6), allowed a player to choose styles representing four different games: the original *Super Mario Bros.*, *Super Mario Bros. 3*, *Super Mario World*, and *New Super Mario Bros. U*. They also came out with the 30th Anniversary-Mario series of amiibo figures. The Classic Color version

was included in the Wii U *Super Mario Maker Super Mario Bros. 30th Set*, which went on sale that year.

On the Nintendo official website, they introduced a series of videos covering the generations. The "Let's Super Mario" campaign invited videos from fans all over the world. On September 13th, there was a festival in Japan celebrating the 30th anniversary. On September 20th and 21st, there was a Super Mario-only musical event called the *Super Mario 30th Anniversary Live*. Another event not only celebrated the 30th anniversary of Mario, but also celebrated the 400th anniversary of the founding of the Rinpa school of art. A golden folding screen of Mario and Luigi, styled after the Wind God and the Thunder God, was made for the occasion, and on October 23rd, 2015, it went on display at the Kyoto Art Museum "Eki" Kyoto.

The Japanese edition of this very encyclopedia was also considered a part of the *Super Mario Bros. 30th Anniversary* offerings.

INTRODUCTION

STORY

After receiving an invitation to come to Peach's Castle, Mario and Luigi head there expecting a fun day and discussions with Princess Peach about the adventures they'll have.

Later, Princess Peach sees them off as they take off as Raccoon Mario and Fox Luigi to gather coins in the sky.

Eventually, the brothers take a short break and land, but a dark shadow obscures the sun above them.

With a booming sound, a Koopa Clown Car filled with Koopalings comes crashing toward the ground, aiming for Mario and Luigi!

Stunned by the sudden attack, Mario and Luigi can only watch as the Koopalings fly off with Princess Peach!

With Peach calling for their help, Mario and Luigi start a brand-new adventure!

FEATURES

GATHER 1,000,000 COINS!

This is a continuation of the *New Super Mario Bros.* series, built for Nintendo 3DS. This time around, not only are Mario and Luigi trying to rescue the princess, but they also need to collect as many coins as they can! To that end, they can use items such as the gold block, which spits out coins when Mario wears it, or transform into Gold Mario and throw gold fireballs that turn blocks and enemies into coins. When Mario and Luigi collect a lot of coins, certain items appear. Also, if your hero goes through a gold ring, all the enemies turn gold, and doing things like throwing a shell can produce more coins for your hero to collect. There are all sorts of ways to collect coins to reach your goal of one million!

COIN RUSH MODE

In addition to the main mode, there is also the Coin Rush Mode. In this mode, three courses are chosen at random, and your heroes compete to see how many coins they can collect. Instead of the 1-Up Mushroom, there are Gold Mushrooms worth an additional fifty coins. There are also special rules here, such as a shorter time limit, plus you will need to learn new techniques that are somewhat different from the ones used in the main mode. Also, if you use StreetPass, you can compare high scores with other people and challenge their scores.

AND MORE

MEMORABLE MOMENTS

Here we'll go over some memorable scenes, many of which are unique to this game within the *New Super Mario* series.

DASH TO WARP

In previous *New Super Mario Bros.* games, you simply get into the cannon and warp. But in this game, the only way to warp is with a successful dash. Once Mario starts running, he doesn't stop, and you have to navigate the special course. Once you clear it, you can successfully warp.

STRIKE A POSE!

Raccoon Mario and other powered-up forms all have different poses when clearing a course.

BRITANNI MARIO

In previous *New Super Mario Bros.* games, if you grab the Goal Pole as Mega Mario, it breaks. That's true of this one too, but the only world you can do it in is W5-6. Still, if you break the Goal Pole, you get a bonus of three 1-Up Mushrooms.

FROZEN IN THE HEADLIGHTS

If Mario gets caught in the flash of light shining out of the Koopa Clown Car, he gets turned to stone and can't move for a while. But petrified Mario is a rare sight that you can't see in other games.

THE HIDDEN GOALS

The only way to get to W4 and W5 is to find the right hidden goals, and then clear the cannon courses that appear. The hidden goal that leads to W4 is in W1-1, which will lead you to the cannon course. Both W3-1 and W4-B will lead you to cannon courses that will get you to W5.

LUIGI GOES ON AN ADVENTURE

After you defeat Bowser, go to the save-file screen. While holding the L and R Buttons, press the A Button and you'll unlock Luigi. He plays just the same as Mario, but where Mario would become Gold Mario, Luigi becomes Silver Luigi, among other visual differences.

THE WAY TO W

After you defeat Bowser and head toward the ending, the world of W opens up. But to proceed into the world, you need to have collected ninety Star Coins. The coins hidden on the W courses are Moon Coins rather than Star Coins.

SHOWDOWN WITH DRY BOWSER

In the very final castle in W, Dry Bowser is awaiting Mario. He throws bones and breathes blue fire to attack. Fireballs don't affect him.

HELPFUL HINTS & TECHNIQUES

Here are some tips and tricks to help you collect coins. If you gather enough coins, a golden Mario statue appears on the title screen.

THE RAINBOW COURSE: A VERITABLE COIN HEAVEN!

In any of the worlds, if the last two numbers on the timer match the course number when you grab the Goal Pole, it opens up a Rainbow Course—a bonus course with a lot of coins! With W1, you need 11. For W2 you need a 77, W3 requires an 88, and on W4, you need a 99.

THE WINGED GOLD BLOCK

If you can get a score of over 200,000, a winged flying gold block will appear on the world map. If you run the score up to the highest number (999,999,999), then the flying gold block appears on every course.

TRIPLE CROWNS

When your extra lives reach triple crowns (meaning 1,110 lives), Mario adventures without his cap. Luigi is the same. Even when you turn him into Mega Mario or Fire Mario, he won't have his cap. But when the remaining lives go down again, he returns to normal.

A GOLDEN MARIO STATUE

When you surpass one million coins, you'll find that a golden statue of Mario has been built on your title screen. If you can collect the maximum amount (9,999,999 coins), you'll find the statue is now a golden Raccoon Mario.

STARRY SAVE FILE

When you fulfill all the necessary conditions, you can get five stars on your save file. Those conditions are to clear the W6-1 course, clear all the courses without using White Raccoon Mario, collect all possible Star Coins, collect all possible Moon Coins, and save the game with 1,110 remaining Marios. If you can go through the whole game without ever having an Assist Block appear, the stars twinkle.

TOAD HOUSE

If you can collect all of the Star Coins from worlds W1-W6 plus W7 and W8, a special Toad House appears on W9, where you can stock up a Super Star.

COINS IN THE CREDITS

As the credits are rolling, you can control Mario and still collect a lot of coins. The coins you collect will be added to your total.

INTRODUCTION

STORY

Princess Peach has invited Mario, Luigi, and the Toads to a tea party! But amid their fun conversation, Bowser and a fleet of Koopaling airships invade the Mushroom Kingdom!

A huge mechanical arm stretches from the biggest ship. It grabs Mario, Luigi, and the Toads and flings them toward the horizon.

They land in a place they've never seen before—right in the boughs of an Acorn Tree. From that vantage point they can see Princess Peach's Castle is still under attack from Bowser's fleet.

Mario and his friends have to make their way back again to Peach's Castle to help her!

FEATURES

UP TO FIVE PEOPLE CAN PLAY!

If you add the Wii U GamePad to four other controllers, up to five people can play this 2D action side-scrolling adventure game. The player with the GamePad can use the touch screen during Boost Mode to start mechanisms moving or stop enemies in their tracks in order to help Mario and his friends get through their adventure.

A single player can also play with the Wii U GamePad alone, seeing the entire world from end to end. And with Baby Yoshi in tow, Mario can make his way to the besieged Peach's Castle.

PLAY WITH Mii!

Aside from the main story mode, you can also enjoy several different types of play. There are three different modes in the game. You can play with your Mii in each of these modes.

Go on several different levels including Free Attack Race. Try to get to the goal in the fastest time!

Boost Mode is a fast-paced race where you can use the touch screen to start mechanisms moving or stop enemies in their tracks.

In Free Attack Race, players compete to pick up coins and get the highest score. Switch things up by editing the courses and place coins wherever you want!

WHEN MARIO'S AWAY, LUIGI PLAYS NEW SUPER LUIGI U!

New Super Luigi U became available as a downloadable title, and was later released on disc. It's a complete remake with eighty-two courses, all starring Luigi. Aside from the special abilities you expect from Luigi—such as his higher jump but slippery footing—there are also features which differ from the main series of games. These include all courses having a countdown clock starting at one hundred. Since Mario is missing, Nabbit has joined the crew with the perk of being immune to enemies' attacks. *New Super Luigi U* was released for download on June 20th, 2013, and was also released with limited-edition packaging exclusively in the year 2013.

AND MORE

MEMORABLE MOMENTS

Here we look back on many of the moments that left an impression. This game featured a huge world and many different dramatic moments.

PEACH'S CREEPY CASTLE

As Bowser's forces take over Peach's Castle, the castle undergoes changes throughout the adventure, gradually taking on creepier aspects.

SECRET COURSE

When you find a hidden goal in a course, a new path will appear leading to a hidden course off the beaten path. If you clear that hidden course, the rest of the path opens, making it a shortcut to Peach's Castle.

GLORIOUS REACTION

If you stop controlling Mario for a while, he'll turn and look expectantly at you. The other player characters react the same way.

CAPTURE NABBIT

After you clear the first course in Layer-Cake Desert, a robbery occurs! A mysterious character named Nabbit steals some items and tries to run away. He appears in certain courses and Mario has to chase him down. If Mario can catch him, Toad will give Mario a P-Acorn as a reward. If Mario can catch him eight times, Nabbit will start to run faster (note: this doesn't count in areas inside Peach's Castle and Superstar Road).

BABY YOSHI COMES ALONG FOR THE RIDE

There are two types of Baby Yoshi on the map. Speak to them and these little guys, brimming with curiosity, agree to accompany you. They've got their own unique abilities, and if you make it to the goal with them, they'll keep adventuring with you. Just remember that Glowing Baby Yoshi only appears on certain courses.

ITEMS ON THE MAP

There are items that fall on the area map screens, and if Mario reaches one, he gets to add the item to his inventory. Just know that there will also be enemies on the map screens too, and if Mario runs into them, he'll have to battle!

PEACH'S CASTLE

The final area in this game is Peach's Castle. Normally it features pretty green gardens and white walls, but under Bowser's influence, the grounds have been covered in lava. The background music for Peach's Castle is a rearrangement of "Inside the Castle Walls" from *Super Mario 64*.

PLAY DURING THE CREDITS

During the credits, you can control how your player characters dance, to a certain extent. They can jump or lift up the other characters or even collect the coins that the Baby Yoshis spit out.

STAR COINS

After you've defeated Bowser and gone through the ending, a special world opens up. Superstar Road has eight courses, and each opens up after you've collected all the Star Coins from each of the other worlds. Also, if you can collect all of the Star Coins from Superstar Road, then a final ninth course opens up.

SECRET ISLAND

After you defeat Bowser, not only can you go to Superstar Road, but you can also reach the Secret Island. There you'll find a small Toad House. Inside you'll find a board which shows fourteen different stats compiled from your feats within the game, such as "Goombas Stomped" and "Goal Poles Reached."

SUPER MINI BOOST BLOCKS

Boost Blocks, which can be placed in Boost Mode, become tiny when you have ninety-nine lives. It gets a lot harder to stand on them!

HELPFUL HINTS & TECHNIQUES

Here's some information that may help on your adventure: To clear the entire game, you will have to catch Nabbit every time he appears.

IMPROVE YOUR SCORE ON YOUR LAST TIME

Star ★ symbols will be added to your save file depending on how much of the game you've completed. Defeat Bowser to get one ★. Finish every course in the first eight areas to get ★★. Collect all the Star Coins on all courses (aside from Superstar Road) to get ★★★. Unlock the final course on Superstar Road to get ★★★★. Gather all the Star Coins on Superstar Road, find every exit in every world, and catch Nabbit every time to finally get ★★★★★.

LINE UP THE NUMBERS AND GET AN ITEM!

If you grab the Goal Pole at a point where the last two digits on the clock align, Toad comes in and gives you an Item. If the numbers are 11, 22, or 33, you get a Super Mushroom. With 44, you get a Fire Flower. With 55, you get an Ice Flower. With 66, you get a Mini Mushroom or a Super Mushroom. With 77, you get a Super Acorn. With 88 and 99, you get a Super Star. But if you get 00, you get nothing.

GET ONE TIME AT TOAD'S HOUSE

At the Toad Houses on Superstar Road, you may be able to get Propeller Mushrooms or Penguin Suits. These items never appear on any of the courses, so these are the only places you can obtain them.

INTRODUCTION

STORY

It was a beautiful night on the evening of a festival. Mario, Peach, Luigi, and Toad discovered a clear pipe in Peach's garden. Mario and Luigi fixed up the strange pipe, unwittingly opening the way to a fairy kingdom.

Suddenly a fairylike Sprixie Princess came flying out. She told them about how Bowser's forces were wreaking havoc in the Sprixie Kingdom, and the other Sprixie Princesses had been captured.

Then Bowser himself erupted from the pipe! He grabbed the Sprixie Princess and retreated back into the Sprixie Kingdom.

Peach led Mario, Luigi, and Toad into the pipe to rescue the Sprixie Princesses—beginning a brand-new adventure for Mario and his friends!

FEATURES

EVERYBODY CAN PLAY!

Made for the Wii U console, this is the first *Mario* 3D action game that's multi-player! Mario, Luigi, Peach, Toad, and the unlockable Rosalina each have their own distinct abilities, and up to four players can play on the same course. Many features have been added, such as Cat power-ups that allow you to climb walls, the Double Cherry that can multiply your character, and several items which, when worn, can give Mario new abilities. This game has more power-ups than any other game in the series. With all these characters and all their different abilities, as well as the plethora of power-ups, this game gives the player more choices than ever before!

VARIED COURSES

Although this follows the same basic structure as *Super Mario 3D Land*, where Mario makes his way through a course aiming for the Goal Pole at the end, this game enhances just about everything from the previous installment. There are some courses you can get through by using the touch screen or mic on the GamePad, and others where you play Captain Toad minigames in a tiny, blocky milieu in which you can move the camera around to plot your next move. Many more features make up all sorts of new types of courses! And with the advent of the wall-climbing Cat Mario, you can explore the courses to their fullest extent.

A MIIVERSE STAMP COLLECTION

Using the Miiverse Service, a player could leave comments on each course. There are items called Stamps that are hidden on every course, and after a player found them, they could use their Stamps to gussy up their Miiverse posts.

CHARACTERS

PLAYER CHARACTERS

Players can choose from four characters to start, each with different abilities. After completing certain conditions, Rosalina can be unlocked as a playable character, too.

PRINCESS PEACH

AND MORE

MEMORABLE MOMENTS

Here we present some of the game's most memorable moments. You will be able to see the scene where Rosalina joins your group only once.

CAPTAIN TOAD'S INTRODUCTION

Captain Toad is also on an adventure to gather up Green Stars. Since Captain Toad is sometimes attacked by enemies, you get his Green Stars when you rescue him. You can control Captain Toad on his own adventures to gather Green Stars on certain special courses.

WIN THE JACKPOT!

As you move along on the adventure, a Lucky House will appear on the world map. There you can play slot machines for coins. The background music is an homage to the character select screen music from *Super Mario Bros. 2*.

PIXEL ART

It was Luigi's thirtieth birthday when this game was released in 2013, and so this game was a part of the "Year of Luigi" campaign. That's the reason why there's a pixel-art Luigi hidden at nearly every turn. One may come out when a block is broken, another may be hidden in the background, and yet another may appear when certain conditions are met. There are all sorts of ways to make them appear, but they're all pretty difficult to find. There are even some hidden in the electronic instruction manual.

DANCING PLANTS

The flowers and grasses planted in the ground dance to the rhythm of the background music (their dance changes when the music changes). It's especially easy to see when Mario reaches the Goal Pole.

START YOUR ENGINES!

In the course W3-6, Mount Must Dash, Mario and his friends use Dash Panels to move forward. This level is based on motifs taken from *Super Mario Kart* for the SNES game system, including the start line, goal line, colorful curbstones, and many other identifiable elements. The background music is also an arrangement of the "Mario Circuit" music from that game.

FANTASTIC FIREWORKS

When the goal is reached and the final digit in your score is 1, then there is one firework. At 3, three fireworks go off, and when it's 6, then five fireworks are set off.

ALL ABOARD THE COIN EXPRESS

If you enter the pipe hidden on the World 5 map, Mario and his friends can find and board the Coin Express. This bonus stage has a huge load of coins piled up. The stage appears again each time you've cleared twenty-five courses.

A LONELY ENDING

If you use warp pipes to get to the next world, then the Sprixie Princesses held in the castles you skipped won't appear in the ending scene.

THE ATTACK

After you've cleared W-1, your best time on each course appears. At the same time, a fast ghost Mii appears on the courses, and they race with Mario and his friends to get the best time.

WHY DON'T YOU PLAY LUIGI BROS.!!

Once you have cleared W-1, a pixel-art version of Luigi appears in the lower left corner of the title screen. When you select it, you can play *Luigi Bros.* This game uses the appearance of *Mario Bros.* for the NES, but the player characters are both Luigis. By the way, if you have *New Super Luigi U* on your Wii U already, then you can play *Luigi Bros.* from the very beginning.

ROSALINA JOINS THE PARTY

When you go to W-2 for the first time, you will see a meeting with Rosalina. When you clear the course, Rosalina can be used as a player character. That course includes Lumas and Octoombas, and has a motif based on *Super Mario Galaxy*.

GO BACK TO THE DEMO SCREEN

After you have cleared W-2, go back to the title screen where the demo automatically plays. Rosalina will start appearing there. Also, after Rosalina has joined your party, she will appear with your other player characters in the credit scroll.

THE FINAL CHALLENGE! WORLD W-1!

Once you have cleared all of the courses up through W-8, collected all of the Green Stars and grabbed every Goal Pole at the very top, the final world—W-1—opens up. If you clear its three extremely difficult courses, you'll have completed the entire game. The background music for this world on the world map is the Rosalina's Comet Observatory theme that was used in *Super Mario Galaxy*.

HELPFUL HINTS & TECHNIQUES

Here we'll give some hints and tips to help in your adventure. To clear the entire game, you'll have to clear every course with every character.

THE STARS ARE YOUR MARK OF HONOR!

If you want prestige for your save file, first you have to see the ending to get the first *. Once you get all the Green Stars up through W-8, you get **. Then clear all the courses of W-1, W-2, and W-3 to get ***. When you've collected all the Green Stars on every world aside from W-1, you get ****. Finally, when you collect all the Green Stars from all courses aside from W-1, grabbed every Goal Pole at the top, and cleared every course with every character, you get *****. Avoid using an Invincibility Leaf and the stars will shine.

PIPES LEAD TO THE NEXT WORLD!

There are hidden warp pipes hidden in courses W2-1 and W4-2 that can take your characters to the next world. In both cases you need to discover a path running above the ceiling leading to the warp pipes.

Once W-1 has appeared, all the courses on the world map will now show the symbols of the characters that have completed them. Additionally, when you have each character complete all the courses, you get a new stamp.

BEFORE HE WAS SUPER

Other Mario titles of the period were, among others, *Mario's Cement Factory* and *Mario's Bombs Away* (both for the Game & Watch).

1981 THE AGE OF DONKEY KONG

The game where Mario made his first appearance is the 1981 arcade game *Donkey Kong*.

It was an action game where the main character climbs girders and uses hammers as his weapons to rescue the kidnapped Pauline from Donkey Kong. He was often referred to as "Jumpman" at the time, and the name "Mario" first appeared in a 1981 flyer promoting *Donkey Kong* in the US. He was officially renamed in the sequel arcade game, *Donkey Kong Jr.* This is an action game where Donkey Kong Jr. uses ropes and fruits to battle enemies in his efforts to rescue his father, Donkey Kong, who has been caged for his misdeeds. In this game, Mario plays the antagonist who is controlling the enemies and attacking Donkey Kong Jr.

During this period, in games like *Donkey Kong II* and *Donkey Kong Hockey* (both for the Game & Watch), the main character was Donkey Kong. In *Donkey Kong 3*, Mario never appears, and the hero is instead Stanley the Bugman.

MARIO BROS. ARCADE VERSION

This was released at about the same time as the Famicom version of the game. The NES version came approximately three years later—and the games were roughly the same. The graphics on the arcade version were slightly larger.

MARIO BROS. GAME & WATCH VERSION

Released in March of 1983, this came out earlier than the NES version. The player controlled Luigi on the left and Mario on the right.

1985 THE AGE OF SUPER MARIO BROS.

This game kicked off the transition from *Mario Bros.* to *Super Mario Bros.* Set in the Mushroom Kingdom, Mario's adventure begins when Bowser kidnaps Princess Toadstool. While this game was sold along with the NES, there was also a version made for the Game & Watch. It also had an arcade version.

DONKEY KONG ARCADE VERSION

Released in 1981, it had a total of four stages, including the second stage (50m) and a demo that wasn't in the NES version.

DONKEY KONG GAME & WATCH VERSION

The main character climbs girders while avoiding barrels. This game used both the screens on the game machine, and this is the first time the plus-shaped Control Pad is used to control the player characters.

VS. SUPER MARIO BROS.

It's based on the NES game, but the course layout is slightly altered and it's a bit more difficult. When you get a Game Over, you may be placed on a Top Scores screen.

CRYSTAL SCREEN VERSION

1983 THE AGE OF MARIO BROS.

The first game featuring Mario's name in the title was *Mario Bros.*, which debuted in 1983. In both the NES and arcade games, the twin brothers, Mario and Luigi, work together to vanquish monsters that appear underground. Here you can see many of the fundamental building blocks of *Super Mario Bros.*, such as coins, pipes, turtle-based enemies and POW Blocks. One of the most popular features was that two people could play at the same time, and its popularity spread Mario's name throughout the world. The *Mario Bros.* game for the Game & Watch was somewhat different, in that Mario and Luigi are placed on the right and left screens, and have to move quickly to and from conveyor belts where many packages are sent along.

MARIO PLAYS HIS PART IN ALL THESE GAMES

This section lists quite a few games in which Mario has played a part—dating back to the Famicom and NES age all the way up to August 2016. While this book has covered the main entries in the *Super Mario* series in great detail, there are still many other titles where Mario is the star or makes a cameo, and yet, this is not an exhaustive list. Certain games where Mario plays a minor role, his likeness is used as an item or decoration, and games that involve a member of the Mario family are included.
